COVENT GARDEN LONDON
NURSERIES: SURBITON, SURREY.
Barr's

"Gold Medal" Daffodils.

We are again this season fortunate enough to be able to introduce some really fine New Seedling Daffodils, several of which have been exhibited by us at the Spring Flower Shows, where they have attracted a great deal of attention.

Five Gold Medals awarded 1908.

Our fine displays of New Seedling and other Daffodils have gained the Gold Medals this season at the Spring Shows of the Midland Daffodil Society, Birmingham; Royal Botanic Society, London; Royal Caledonian Society, Edinburgh; Shropshire Horticultural Society, Shrewsbury; and Breconshire Horticultural Society, Brecon. At the Spring Show of the Royal Horticultural Society, London, April 28th, our exhibit gained the highest award, Silver-Gilt Floral Medal.

PRESS NOTICES.

DAFFODILS AT SURBITON.

"It has been our pleasure for several years to visit the nurseries of Messrs. Barr & Sons, at Surbiton, to see the Daffodils in flower, but we have never until this season received the invitation so late as in May. The flowers have bloomed abnormally late, and small wonder, when one remembers the arctic weather that has characterised the spring of 1908. Not only did the cold retard the flowering of the bulbs, but the heavy rains of April caught them when in bloom, and then, when a few warm days did appear, the flowers were quickly over. Thus, in a measure, we were disappointed, but these flowers are cultivated on such a large scale at Surbiton that there still remained abundant material of interest, and it was an easy task to find some late flowers of the majority of the varieties. In addition, a late duplicate planting of all the best early kinds is practised by Messrs. Barr in order to furnish material for hybridising with later-blooming sorts. The weather on the occasion of our visit was glorious, and in addition to the Daffodils, the great breadth of May-flowering Tulips, with Iris of the Pumila type, Polyanthuses, Ranunculuses, and a host of other hardy spring flowers, made a beautiful picture. The principal entrance to the fields of Daffodils is through a small rock-garden, to which we have often referred in former notes, but we have never before seen it so prettily furnished with flowers.

"Of varieties of Daffodils it may be said that their number is almost endless, and Messrs. Barr's latest list enumerates nearly 400 distinct sorts, which, of course, does not represent all the varieties in commerce, although most of the best varieties are included in it. The first of which we have note is the variety named Evelyn Hodge. It was raised from N. montanus x N. biflorus, and possesses a white perianth set off with a small, pale-coloured corona.

"Merry Maid" was raised at Surbiton in 1907. This is a tall, late-flowering Narcissus of the Barri section, with a pure white perianth, tapering in its segments, and crowned by a corona that is yellow and tipped with orange. Bianca is a Leedsl Daffodil that has its white perianth set off with a lemon-coloured cup, the latter being prettily fluted. Agnes Harvey is a variety of rather delicate growth; this is another of the Leedsl section. It often develops two or more blooms on a scape, and is to be recommended for its charming form. Egeria has the large, flattened corona of the Engleheart section, to which it belongs, and beneath its crown the broad, white segments form a perianth of the finest type.

"Amongst the best of recently-raised trumpet Daffodils is C. H. Curtis. This is a bold flower, having a handsome corona that recurs somewhat at the mouth. The perianth is a deep shade of yellow, but not so intense as the golden cup. Another flower of the C. H. Curtis type is George Philip Haydon. The mouth of the trumpet also expands in this variety, and it is finely fluted, but the colouring in both perianth and cup is paler than in the flower named after C. H. Curtis, and its appearance is stiffer. Knight Errant is also a trumpet Daffodil, but with white perianth and sulphur-coloured trumpet. Its parents were probably Mad. Plein and Cernuus. A beautiful white Daffodil is seen in Eileen Mitchell, and, as one of its parents was N. triandrus, the character of producing more than one

flower on a scape is perpetuated in the hybrid, and twin flowers are common. The white of its floral parts is of remarkable purity, and the habit is very graceful. The variety beauty is not new, but it cannot be passed over without comment. It is a fine, bold flower of the Incomparabils type, with a pale yellow perianth and a large cup that is tinged with orange. This variety may be recommended for any of the purposes to which the Daffodil is utilised, and is especially valuable for cutting. It is one of the cheapest of Daffodils, and should be largely grown wherever these beautiful spring flowers are planted. White Lady is characterised by a broad perianth of beautiful form, the cup being slightly tinged with yellow. It has the advantage of being a free bloomer, and deserves inclusion in a selection of the best varieties. Silver Moon, Sylvia, May Dew, and Fantasia are varieties of a similar type, and valuable for naturalising in grass and woodlands. All these, save Sylvia, were raised at Surbiton last year. They bear their inflorescences well aloft, and have stary white perianths. Rosalind is one of the Dolly-Cup Daffodils, one of the best in its section. The cup is bright yellow, and it is tinged with scarlet. The habit is very robust. Autocrat is a choice flower of the Incomparabils type, one of the cheapest of Daffodils to purchase. Una is remarkable in its bold foliage, which appears to droop. The perianth is creamy white, its bold corona being suffused with citron colour, which deepens to apricot at the edge. A fine star-shaped Daffodil is the variety named after Frank Miles; it is to be recommended for planting in grass land. The beautiful white trumpet Daffodil Alice Knights was past its best condition, but enough remained to show what a lovely flower it is. This may be regarded as the best of the early white trumpet section. Czarina, a giant Leedsii, is certainly among the finest of its class; it is quite new. The yellow trumpet Daffodil Lord Roberts is a flower of large size, massive in both corona and perianth, which are coloured golden-yellow. This variety was raised at Surbiton. Our list is still incomplete, but we have no space to describe the many other varieties of which we made note, including Loveliness, Monarch, Gloria Mundi, Goddess of Westminster, Cloth of Gold, Cassandra, Blackwell, Ariadne, Cygnet, Glory of Leiden, Hamlet, Lady Margaret Boscawen, Janet Image, Peter Barr, Salmonetta, Queen Christina, Stella superba, Victoria, Weardale Perfection, and Blood Orange. Most of these are well-known varieties, and all are worthy of a place in a collection of the best kinds.

THE HOME OF THE DAFFODIL.

"In one sense Surbiton may be regarded as THE HOME OF THE DAFFODIL, for here are the Nurseries of Messrs. Barr & Sons, and it was Mr. Peter Barr who first made the horticultural world comprehend the beauty and usefulness of this family of spring flowers. Ever since Mr. Barr brought together existing varieties, and commenced to introduce new ones, the firm has also done much work in improving the flowers by cross fertilisation. So long as Daffodils are grown the name of Barr will be held in high esteem.

"This season, the Daffodil season, so far as the big breaths of varieties are concerned, was a very short one at Surbiton, but small batches planted late in various positions enabled visitors to make comparisons and selections for future guidance and use. The newer varieties attracted our attention mostly. The brilliant broad-cupped Will Scarlet was very fine; it gives a bit of the finest colour in the family. Cassandra and Chaucer are both good Poet's Narcissi. Sylvia, a strong-growing Leedsii form, is charming, but White Lady has even greater charms, and is a fine grower, with large white flowers. Rosalind, a pretty white Burbidgei, with deep red eye, is a fine and useful late Daffodil; while Firebrand in the same section, is notable for its brilliant cup. Royal Star, a grand flat-crowned Daffodil, marks the progress made in this particular direction; the broad, frilled crown is yellow, orange, and orange-red—a striking combination. Polestar, Egret, and Sequin all belong to this latter section, and the last-named, with its flat yellow crown, is very pretty.

"Evelyn Hodge, a cross between N. montanus and N. biflorus, has a round white flower with yellow eye; it is free, late, and quite new. Of different character is the new Merry Maid, a very rich Bariri form with a vivid red rim to its yellow crown. Agnes Harvey, a beautiful Leedsii, and Bianca, a refined flower of the same class, merit special attention. The newer trumpet varieties include the king of white trumpet Daffodils, Peter Barr; G. P. Haydon, a splendid variety with palest yellow trumpet and white perianth; Knight Errant, white with lemon trumpet; Pharaoh, creamy white with pale yellow trumpet; C. H. Curtis, a grand golden flower with heavily frilled trumpet mouth; King Alfred, golden; and Mrs. G. H. Barr, snowy white. . .

"The Surbiton collection is rich in fine Leedsii Daffodils, and a few others besides those already referred to are Janet Image, one of the biggest and best; Elaine, silvery white; Diana, white and lemon-yellow; Maggie May, white and citron; Heroine, snow-white with citron and orange crown; Silver Moon, silvery white, very pretty; White Slave, and White Queen, the latter a large and pure white variety with citron-tipped crown."
CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

Soil and its Treatment.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather sandy loam. When the soil is of a dry and sandy nature, it should be deeply dug, if possible at least a season before planting the bulbs, well-decayed stable manure being added, and a potato or other vegetable or annual crop grown on the ground. Before the bulbs are planted a sprinkling of quicklime should be spread on the surface and then dug in. If it is not convenient to first take off a crop of Vegetables or Annuals, then, in digging, give a dressing of lime to the top spit, and work in a little well-decayed stable manure one foot below the surface, so as to be out of the reach of the bulbs; the manure is used not as a stimulant but as a sponge to hold moisture in the soil. The ammonical properties of manure are injurious to the Daffodil, hence great care is necessary in the use of it. On good retentive loamy soils stable manure is not required, but a dressing of lime may prove beneficial.

Fresly Dug Soil should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are sometimes drawn under considerably below their proper depth, and the bloom in consequence is apt to be weakened and retarded the first season.

The Best and Safest Manure to use is Crushed Bones or Basic Slag (for price see page 37). This should be applied at planting time, and may be mixed with the soil or placed next the bulbs; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or 1 1/2 oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or 7 1/2 oz. to the square yard. We recommend for light soils Crushed Bones (provided they are genuine) in preference to Basic Slag. On very poor and DRY SANDY SOILS we recommend in addition SULPHATE of POTASH (for price see page 37), to be sprinkled annually in the autumn over the surface of the ground, after planting, at the rate of 2 cwt. to the acre, or about 3/4 oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold moisture in the soil, a condition so essential to the perfect development of the Daffodil. We also recommend the use of Phytobromia in autumn and spring (see particulars, page 37).

In Early Spring, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains; a handy tool for this purpose will be found offered on page 38. Where practicable it is advisable to cover the ground in November with some light covering material (the idea is to prevent the autumn rains from beating down the crust of the ground, and to break the severity of a sudden frost). We use for this purpose pulled heather; cut furze or gorse, however, answers the same purpose; cut fern or bracken is bad, as it lies too wet; old pea sticks laid across the ground are good, or on flower beds sprinkled or small branches of cut evergreens stuck into the ground answer the purpose and look decorative; these, of course, need renewing when they get shabby. Do not mulch the beds with manure.

Planting and Lifting.—The best time to plant, to obtain the finest flowers, is during September, although bulbs may be put in as late as Christmas with fairly satisfactory results; we have planted some Daffodils as late as the second week in February, and had some very good blooms the third week in May. We recommend, however, early planting. The bulbs may be left undisturbed for years in ordinary good loamy soils, but on poor and light soils they are better lifted every other years, as soon as the foliage has died down, and replanted as early as is convenient. Never plant when the ground is wet and sticky. Do not put silver sand around the bulbs of Narcissi except in the case of N. corbularia.

Depth to Plant.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of 2 to 3 inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be covered with soil once and a half its own depth, measuring the bulb from the colar of its neck to its actual base. On light sandy soils the bulbs may be planted a trifle deeper than on heavy stiff soils, and in the North of England and in cold localities they should be put perhaps a trifle deeper than in the warmer southern districts.

Position and Grouping for Effect.—All Daffodils prefer partial shade, although many of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by an *. In the flower border, to obtain the best effect, Daffodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping Daffodils the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period, by a judicious arrangement, a constant succession of flower is obtainable. On page 15 we denote the rotation of blooming.

Naturalising Daffodils in Grass, Etc.—All Daffodils may be planted in grass with perfect success. To produce the best effect, the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor Poet’s Narcissi with the Star Narcissi. In arranging, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and planting them where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are never found in nature. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots of the trees come close to the surface.

Varieties specially Suitable for Naturalising in Woodlands, Grasslands, Glades, Etc., Delighting in Partial Shade. These are mostly wild plants—Alcyon, Countess of Annesley, Golden Spur, Henry Irving, Obvallaris, Spurius, English Leu Lily, Princeps, Scoticus, Albicans, Pallidus Procos, Moschatus of Haworth (very pretty in grass), Johnstoni Queen of Spain (in our opinion the most beautiful of all for this purpose), and all varieties of Poeticus, including the old Double White. The Varieties underlined we do not recommend for the cultivated border, as they deteriorate the second year, while in woodlands, grass, or meadowland they flourish.
Naturalising Daffodils in Grass, Etc.—continued.

Varieties specially Suitable for Naturalising in Grasslands, Parks, on Lawns, Meadows, Etc.—The following are all very free bloomers, good strong growers, as well as distinctive effective varieties, showing up well from a distance; the flowers are beautiful and valuable for cutting: Emperor, Empress, P. R. Barr, Queen of Spain, W. P. Milner, Horsfieldi, Mrs. Thompson; all handsome trumpet varieties; the following are the best of the chalice-cupped: Incomplt. Beauty, Frank Miles, Stella superba, Sir Watkin, Leedse M. M. de Graaff, Duchess of Brabant, Minnie Hume, and Mrs. Langtry; Barrii conicus, Flora Wilson, Crown Prince and Siddington, Odoros and O. rugulosus; of the Poets or Dolly-cupped the following are the best: Ellen Barr, Falstaff, John Bain, the early Phasian's Eye (Poticus ornatus), and the late Phasian's Eye (Poticus of gardens); and of the double-flowered daffodils: The Old Maid, Double Tazetta, Double Fans, and Collinns and Cream.

For Lawns and Tennis Courts which have to mown early we recommend the dainty Minimus and Cyclamineus, which make a charming picture. Being very early varieties the grass may be safely mown in May.

Varieties Suitable for Planting by the Water Side.—Daffodils produce a charming effect when growing at the water's edge. The following varieties we can strongly recommend for this purpose—Odoros and Odorus rugulosus, with their rash-like foliage and graceful golden flowers; Duchess of Westminster, John Bain, and the old late Phasian's Eye Narcissus (Poticus), with their graceful starry flowers; Emperor, P. R. Barr, and Empress, three noble trumpeters; Sir Watkin, Barrii conicus, Stella superba, Beauty, Frank Miles, and the Double White Poticus or Gardena-flowered Narcissus, etc. In choice spots near the water's edge the charming little Cyclamineus should be planted, as also the sulphur-coloured Hoop Petticoat Narcissus (N. Bulbocodium citrinum), both of which luxuriate in moist grassland.

Method of Planting Daffodils in Grass.—We recommend for this work our Special Bulb Planter (see illustration, page 38). By the use of this implement the trouble of planting bulbs in grass is reduced to a minimum. It takes out a clean, circular piece of turf 2 to 2 1/2 inches in diameter, and of sufficient depth. On making the second hole this piece of turf is released from the planter and lies ready on the ground to cover the bulb with earth. The soil is not in any way tightly packed and made hard, which is the case when an ordinary dibber is used, and the appearance of the grass is not spoilt; in fact, after planting 10,000 bulbs with this tool on a greensward, one could not detect that the grass had been touched. If the ground is very poor and thin, a compost of fresh soil with an abundance of Crushed Bones (7 lbs. to a bushel) should be made and dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the soil of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. (For price of Barr's Special Bulb Planter, see page 38.)

The Best Time for Planting in Grass is with the advent of the autumn rains, when the ground is in a fairly moist condition, it being impossible to plant whilst the ground is hard and solid from the summer heat; moreover, nothing is gained by planting in hot dry ground, to say nothing of the cost and labour of planting.

Cutting Daffodils for Decoration.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud is bursting. Place in water and allow the flowers to expand in a cool greenhouse or sitting room. The blooms opened in this way are larger and purer in texture and of better colour than those which develop out of doors.

Culture of Daffodils in Pots or Boxes.

Time of Potting.—Pot as early in autumn as possible to obtain the finest results and earliest blooms.

The best Compost to pot Daffodils in is a mixture of two-thirds good fibrous loam (which should be pulped to pieces by the hand and not passed through a sieve, so as to retain in the soil as much old root fibre as possible), and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1 1/2 lbs. of bone meal or Phytohrom (see page 37) to every bushel of soil, which mixture is then ready for use. Never pot in soil that is wet or sticky. Barr's Fertilised Fibre, Shell and Charcoal may also be used; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting. (See page 37.)

The Pots should be carefully washed or wiped clean before using. Never pot in dirty or wet pots.

Good Drainage should be secured by placing three or more pieces of broken crocks over the hole, placing the crocks with bevelled sides uppermost, then cover crocks with a little rough fibre from the loam. When boxes are used, the sift at bottom of box should be covered with crocks, a good layer of rough fibrous loam placed at bottom of box, or a layer of leaf soil to ensure perfect drainage.

In potting, the larger bulbs should be two-thirds covered with soil and the pots filled to within half an inch of the rim to allow of watering when in growth. The small bulbs of the miniature species should be covered with half an inch of soil.

After potting, stand the pots or boxes outside in the open, under a north wall by preference, on a firm bottom such as a box of ashes or gravel path to prevent the entrance of worms. The pots should be plunged bodily in Cocoa Fibre, ashes, or old decayed leaf soil, filling in covering material in between the pots, which should be completely buried to a depth of 4 inches. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots are plunged in the open they will require no watering.

The pots or boxes should remain plunged for a period of not less than twelve weeks, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, but in the light; in a sitting-room select a window that catches the morning sun. Very weak liquid manure-water may then be given once a week until they come into bloom. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow- forcing house, but this should never exceed 65° if really fine blooms are desired. The plants should
Culture of Daffodils in Pots or Boxes—continued.
always be kept as near to the glass as possible and not allowed to get drawn from an insufficient supply of light or air. On no account should bottom heat be given in forcing Daffodils.
Of the stronger growing sorts use three to six bulbs, according to size of bulb, for a pot measuring 4½ to 6 inches in diameter; of the small miniature kinds, such as N. Minimus, Nanus, Minor, Cyclamineus, Triandrus, Juncifolius, and Corbularia, use twelve to eighteen bulbs for a 4½ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may easily be had in bloom in January:—N. Minimus, Minor, Nanus, and Cyclamineus, and these may be mingled with Scilla silbarica, Chionodoxa, as both bloom at the same period and produce a charming contrast. The White Hoope Petticoat Narcissus should be potted in almost pure sand kept well moist, and if placed at once in a cold frame after potting may be had in bloom by Christmas. (See Keck Garden Collections of Miniature Daffodils, page 8.)
If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes, giving same culture as recommended above for growing in pots. Of the best varieties to grow for early forcing in boxes, the following command a first place: First early sorts—Queen of Spain, Henry Irving, Golden Spur, Sir Watkin, Old Double Yellow Daffodil; Second early sorts—Emperor, Empress, Horsfieldii, P. R. Barr, Barri conspicus, Incomparabilis Beauty, and Stella superba. All the miniature Daffodils make charming pot plants, especially the following: N. Minimus, N. Cyclamineus, N. Triandrus albus (Angel's Tears), and N. Juncifolius.

All Daffodils may be grown in pots, but in the following pages we have indicated thus † those kinds which are best for this purpose.

CULTURE OF DAFFODILS IN VASES AND BOWLS.
A charming effect can be obtained by growing Daffodils in fancy vases or bowls, with or without drainage, by simply using our specially prepared Fertilised Fibre, Shell and Charcoal Mixture (3/4d. per bushel, 1/2 per peck); the mixture is light, clean, and nice to handle, and remains sweet (an important matter where the vases used have no drainage holes); indeed, it is in every way superior to potting soil for growing Daffodils and other bulbs in fancy bowls and vases.

Culture.—Fill the vase or bowl with the Fibre, Shell and Charcoal Mixture up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil, just covering them. After planting, plunge the bowls or vases out of doors on a bed of cocoa fibre or ashes, and cover entirely with cocoa fibre, leaving them thus for about 12 weeks; they may then be transferred to a sunny window of a cool airy sitting-room (selecting a window that gets the morning sun) or to a cool greenhouse placed close to the glass, where they may be flowered in the same way as pot Hyacinths; they should be kept as near the glass as possible, and given sufficient light and air to prevent the foliage becoming drawn. When the flower buds are advanced, they may be removed to a warmer temperature, such as a slow forcing-house or a warmer sitting-room, still being given as much light as possible. No bottom heat must ever be given, neither should they be placed in too warm a temperature until the flower buds are well developed.

Where it is not convenient to place the bowls outside they may be plunged in cocoa fibre in a cold frame, or cool airy cellar, giving sufficient water after planting to make the fibre mixture moderately damp. For the first week or two after planting, water must be given sparingly, sufficient only to keep the fibre mixture damp enough to encourage root action; as soon as the bulbs are well rooted, water should be given more freely, the fibre mixture being then kept quite moist. The fibre must never be allowed at any time to become dry, even for a day, or the bulbs will suffer.

SPECIAL FANCY VASES AND BOWLS for growing Daffodils, etc., in.

Three bulbs of N. Queen of Spain growing in Barr’s Fertilised Fibre in a 1-inch "Doulton-Ware" Vase, without drainage hole.

We have had special little fancy vases made for us by Messrs. Doulton for growing Daffodils and other spring bulbs in our Fertilised Fibre and Charcoal Mixture. The vases are of elegant shape, of a neutral art drab shade, and without drainage holes, thus saving the use of saucers. They will be found most useful for growing not only Daffodils in, but also Tulips, Hyacinths, Crocuses, early Scillas, Snowdrops, Chionodoxas, and Lily of the Valley, also the charming winter-flowering Irises—reticulata, etc., either for table decoration or the greenhouse. During summer they may be used for table decoration planted with Pansies and such low-growing hardly flowers, or for standing little pot-plants in. All Daffodils which may be grown in pots may also be grown in these fancy bowls, and in the following pages we have indicated thus † those kinds most suitable for the purpose.

Barr’s "Doulton-Ware" Bulb Vases (as illustrated)—2½ in. diameter, ½ 9; 4 in. dia., 1½; 5½ in. dia., 2½; 7 in. dia., 3½ each.

Fancy Decorated Japanese Bowls:—5 in. diameter, ½; 6 in. dia., 1½; 7 in. dia., 1½; 8½ in. dia., 3½; 9½ in. dia., 4½; 10½ in. dia., 6½; 12 in. dia., 5½ each.

Barr’s Fertilised Fibre, Shell and Charcoal Mixture, for growing bulbs in Vases, Bowls, Jardinets, etc., 32. 6d. per bushel; 12. per peck (bags free).
Barr's 42/- Collection of Daffodils for Pot Culture, for Greenhouse and Indoor Decoration.

The following Daffodils may be gently forced for early bloom during winter and early spring months, and if after flowering they are turned out of pots and carefully planted out (the ground being well watered previously, should it be dry) they will mostly bloom well outdoors the following season:

- **All strongest selected bulbs:**

BIFLORUS, The Primrose Peerless Daffodil. (See page 37.) For Inexpensive Mixtures of Daffodils for naturalising and large plantings, see page 8.
Barr's Inexpensive Mixtures of Daffodils.
To Naturalise in Shrubberies, Orchards, on Grassy Slopes, etc., and for cutting.

Single Trumpet Daffodils, Mixed, including Princesse, Queen of Spain, Abscisusus, Rugilobus, Spurius, etc., etc., for naturalisation .............................................................. per 1000, 3½; per 100, 4/-

Single Chalice-cup or Star Narcissi, Mixed (Incomparabiles, Leedsii, and Barrii varieties), for naturalisation in grass, etc. The grand effect of these light graceful Daffodils, when naturalised, must be seen to be realised. Their value as cut flowers for bouquets and vases cannot be over-estimated... per 1000, 3½; per 100, 3½

Single Dolly-cup or Poet's Narcissi, in Mixture, comprising varieties of Barbidgei and early Poeticus, for naturalisation in grass, etc. For cutting, the flowers are greatly prized.

Splendid Mixed Daffodils of Many Sorts, for naturalisation, including Trumpet, Chalice-cup, and Dolly-cup or Poet's Narcissi, a special mixture of Daffodils of all kinds suitable for large plantings in Grass, Woodland, etc. .............................................................. per 1000, 25/-; per 100, 2½

Miniature Daffodils for the “Rock Garden.”
The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the Corbularios (except Corbularia monophylla) and Cyclamines like moisture, and should therefore be planted at the foot of the rockery. Corbularia monophylla flourishes in a warm dry situation, planted in almost pure sand; when coming into bloom give water freely. Triandrus albus (Angel’s Tears) and Cyclamineus delight in partial shade and a light gritty soil, and should be given a well-drained position. In the case of these Miniature Daffodils, the ground may be carpeted with close-growing surface-rooting plants, such as Arenaria serpyllum var. T. lanuginosus, Herminium glabra, Mossy Saxifragas, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

For extra choice Mixtures for the Flower Border, see page 6.

Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

(excepting Triandrus calathinus and concolor)...........

Daffodil Seed for Autumn Sowing.
With the exception of some of the miniature Daffodils, like Minimus, Bulbocodiums, etc., Narcissi take 7 to 10 years to bloom from time of sowing the seed.

Choicest Yellow Trumpet Daffodils in Mixture, saved from Lord Roberts, Monarch, Haunted, Admired Maharoff, etc. .............................................................. per pkt. 5/- & 7½

Choicest Bicolor and White Trumpet Daffodils in Mixture, saved from Woodgate Perfection, Duke of Bedford, J. B. M. Camm, Cygnet, Joelle, Lady Andrey, E prevent, Madame de Grenelle, etc. .............................................................. per pkt. 5/- & 7½

Choicest Chalice-cup Varieties in Mixture, saved from Lucifer, Lucina, Peach, Siddington, Strong, etc. .............................................................. per pkt. 5-.

Choicest Dolly-cup Varieties in Mixture, saved from Rosalind, Harrow Hedge, Cherry Hide, Meriden, Vivid, etc. .............................................................. per pkt. 2½

Choicest Poet’s Narcissi in Mixture, saved from Cassandra, Herrick, Chaucer, Glory, etc. .............................................................. per pkt. 2½

Mixed from all Sections .............................................................. per pkt. 1/- & 2½

Miniature Daffodils, flowering soon from seed, all beautiful on rockwork—
Bulbocodium citrinnum (Sulphur Hoop Petticoat), per pkt. 1/-; Large Early Yellow Hoop Petticoat, per pkt. 1/-; Small Early Yellow Hoop Petticoat, per pkt. 1/-; Cyclamineus, per pkt. 1/-; juncifolius, per pkt. 1/-; triandrus albus, per pkt. 6/-; triandrus calathinus, per pkt. 1/-.
Barr's New Seedling Daffodils for 1908,

Including several which are offered for the first time.

Specially notable among the new varieties we exhibited this spring were Banzai, Beduin, Blazing Star, Buttercup, Catriona, Corallina, Cygnet, Czarina (a grand flower), Eileen Mitchell, Fair Maiden, Fiery Cross, Furnace (with a wonderful brilliant colour), Henri Vilmorin, Isis, Lohengrin, Lola, Lord Kitchener, Loveliness, Mrs. George H. Barr, Oracle, Peter Barr, Pyrrha, Queen Christina, Radiant, Red Emperor, Seraphin, Sirdar, Sir Lancelot, Sunrise, Torchlight, Tennyson, and Venus—all grand Exhibition flowers.

§3 Where we have a record, we give in inches the heights as registered at our Surbiton Nurseries.

The relative qualities as we judge them we have indicated by xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being earliest, (5) being latest.

</table>
Barr’s New Seedling Daffodils for 1908—continued.

**Concord** (Engleheartii), xxxx, new 1906, a perfectly formed flower with very broad rounded perianth of a soft deep primrose, well inbudded; large flatish golden crown, heavily margined fiery orange-red and prettily cut at margin, ht. 15 in. .................................................. 2 2 0

**Coralina** (Leedsii), xxxx, new 1907, a remarkably refined and beautiful flower showing quite a new break of colour, perianth white and campanulate, crown straight, prettily fluted, colour pale brick-rose deepening at margin to delicate orange-red; **AWARD OF MERIT** Birmingham, April 23, 1907 .................................................. 15 0 0

**Cossack** (Barrii), xxxx, new 1908, a remarkably beautiful and striking flower with broad white solid perianth slightly reflexing, cup spreading and of intense dark orange-red; a fine exhibition flower .................................................. (only two or three bulbs for sale) 5 5 0

**Cygnet** (Trumpet Daffodil) (4), xxxx, new 1902, raised by Rev. G. P. Haydon, very bold white perianth, broad and elegantly twisted, long bold trumpet of a soft canary-yellow, elegantly rolled back at mouth, very beautiful; **AWARD OF MERIT** R.H.S., April 22nd, 1902; **AWARD OF MERIT** Birmingham, April 16th, 1903; **AWARD OF MERIT** R.B.S., April 24th, 1907 .................................................. 7 7 0

**Czarina** (Giant Leedsii), xxxx, new 1908, the largest and handsomest of the Giant Leedsii, a grand flower of immense size, measuring 5 in. across, broad white perianth elegantly twisted and very large delicate citron crown 1½ in. long with bold open mouth; tall robust grower .................................................. (only one or two bulbs for sale) 3 0 0

**Dainty** (Johnstonii), xxxx, new 1908, perianth delicate primrose, trumpet broad and globular with open mouth, soft primrose-yellow; **AWARD OF MERIT** Birmingham, 1904 .................................................. 2 2 0

**Diana** (Giant Leedsii), xxxx, new 1906, broad white perianth inclined slightly to reflex, very large expanded crown of a pretty lemon shade, elegantly flanged and crimped at margin, flower large and beautiful, ht. 17 in. **AWARD OF MERIT** R.I.H.S. .................................................. 1 1 5

**Eileen Mitchell** (Triandrus x Leedsii) (4), xxxx, new 1907, a remarkably beautiful and refined flower of the *purest white* throughout, crown cup-shaped and prettily fluted; of very graceful habit, ht. 17 in. This is perhaps the *purest white of all Daffodils* .................................................. 3 3 0

**Emerald** (Burbidgei), xxxx, new 1907, *raised at our Surbiton Nurseries*, a hybrid of *Narc. Montana x Poeticus*; flower large, perianth pure white with beautifully frilled small crown, rich green with broad white margin, very attractive, late-flowering .................................................. 3 3 0

**Eoster** (Leedsii), xxxx, new 1906, a very refined flower of perfect form, perianth white, flat, stiff and well inbudded, pretty globular lemon cup; **AWARD OF MERIT** R.H.S., 1906 .................................................. 1 1 0

**Etelbert** (Burbidgei), xxxx, new 1908, very broad fine white perianth, cup canary, deeply margined orange; a remarkably lovely flower of perfect form; **AWARD OF MERIT** R.I.H.S., 1904 .................................................. 3 3 0

**E. T. Cook** (Trumpet Daffodil), xxxx, new 1905, bold broad white perianth and a rich deep chrome-yellow trumpet, ht. 14 in. .................................................. 3 3 0

**Eveline** (Trumpet Daffodil) (3), xxxx, new 1907, perianth snow-white, trumpet white with prettily cut margin, ht. 10 in. .................................................. 0 5 6

**Fair Maiden** (Barrii) (3), xxxx, new 1908, flower large and after the style of *Scagull* but of better form, perianth pure white very broad and inbudded, crown open and elegantly fluted, yellow with orange-buff margin, a beautiful flower; strong grower, ht. 18 in. .................................................. 0 1 2 6

**Fidelia** (Burbidgei), xxxx, new 1907, *raised at our Surbiton Nurseries*, perianth white, crown primrose shading to sulphur-yellow, sweet-scented .................................................. 2 2 0

**Fiery Cross** (Engleheartii), xxxx, new 1908, perianth cream-coloured, broad and slightly reflexed, crown wide and expanded, elegantly fluted, brilliant yellow, with heavy margin of very bright fiery red; very striking and beautiful .................................................. 5 5 0

**Finella** (Burbidgei), xxxx, new 1907, *raised at our Surbiton Nurseries*, large spreading flower with snowy white perianth, crown bright lemon, prettily fluted, tall and late .................................................. 1 1 0

**Fireflame** (Incomparabilis), xxxx, new 1908, a valuable and remarkably showy early variety, perianth rich yellow, crown straight and elegantly fluted, of a fiery orange-scarlet; very showy either in borders or as a cut flower .................................................. per doz. 10/6

**Furnace** (Burbidgei), xxxx, new 1908, flower large, perianth pale canary, cup expanded, elegantly fluted and flamed and of the most brilliant deep fiery orange-red of the most brilliant; At the Birmingham Show, April 23rd, 1908, this was considered the *Richest Coloured Flower in the Show*. Unfortunately we had not sufficient flowers of it to obtain a Certificate from the R.I.H.S. this season .................................................. (only one or two bulbs for sale) 15 1 0

**George Philip Haydon** (Trumpet Daffodil) (3), xxxx, new 1905, *raised by Rev. G. P. Haydon*, a very large refined Daffodil, perianth primrose, broad and of fine texture, trumpet very bold, canary-yellow with very large open mouth boldly fluted and flanged, a strong grower with very broad foliage, ht. 18 in. .................................................. 12 1 2 0

**Geraldine** (Barrii), xxxx, new 1908, a striking large flower with white perianth shaded sulphur at base, cup intense orange-scarlet .................................................. 7 7 0

**Greenheart** (Burbidgei), xxxx, new 1907, *raised at our Surbiton Nurseries*, a very remarkable flower, cup canary, earthy, bearing two flower buds on a very short stem. The perianth is wingy and of a solid white, while the crown, which is very minute, is olive-yellow with a dark green interior, tall and late-flowering .................................................. 1 1 0
Barr’s New Seedling Daffodils for 1908—continued.

Gwendalin (Trumpet Daffodil), xxx, **new 1905**, raised by Rev. G. P. Haydon, white perianth and long straight pale primrose trumpet, large noble flower ................................................... £ 5 s. d. each. 12 12 0

Hatfield Beauty (Trumpet Daffodil) (3), **new 1905**, raised by Rev. G. P. Haydon, a bold and showy flower, perianth cream-coloured, trumpet bright canary-yellow with expanded and elegantly flanged brim, ht. 21 in. ...............(only a bulb or two for sale) 2 2 0

Henri Vilmorin (Trumpet Daffodil) (3), **new 1903**, raised by Rev. G. P. Haydon, a most beautiful white Trumpet Daffodil of refined texture and form; trumpet long and of great substance, perianth spreading and of Empress shape, flower 4½ in. across, ht. 13 in. AWARD OF MERIT R.I.S., April 19th, 1901 ...................................................... 10 10 0

Barr's General List of Daffodils
for 1908.

For Alphabetical List of all the Varieties offered in this Catalogue, see General Index, page 2 of Cover.

The following list of Daffodils embraces the highest class and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. It represents the cream of our Collection (over 500 kinds), and the best of the newest varieties in commerce up to 1908, several being offered to the public for the first time this season.

During the past few years we have rejected many of the older kinds which we considered had been superseded by better sorts at equally moderate prices. We can, however, generally supply such if required, as, although we do not catalogue them, we keep a small stock of them at our Nurseries.

Time of Flowering.—The relative period of flowering of the different varieties and species out of doors we have denoted by means of numbers after the names, thus:

1. *1st early,* flowering from February to early March.
2. *2nd early,* flowering in March.
3. *Varieties flowering in mid-season,* or early in April.
4. *Late-flowering varieties,* from middle to end of April.
5. *Very late-flowering varieties,* opening in May.

The actual period of blooming depends upon the season and district; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March; but the natural rotation would remain the same.

Height.—In most cases we give also the heights in inches as recorded at our Nurseries.

Quality of Flower.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. The result we have added to this catalogue, trusting it may be found a useful record to amateurs.

* The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.
† indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition; they are all splendid border varieties.
§ indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass; they are all strong growers and free bloomers.

Any Daffodil not offered in this Catalogue we can generally supply, and shall be pleased to quote for such.

GROUP I.—MAGNIF-Coronati.

LARGE CROWNED OR TRUMPET DAFFODILS,

including the species Cyclamineus and Hoop Petticoat Daffodils (Bulbocodium or Corbularia), also the hybrids Johnstoni, Backhousei, Tridymus, and Humei.

DISTINGUISHING CHARACTER.—Tube of flower as broad as it is long and the crown or trumpet more than three-quarters as long or longer than the perianth segments or petals.

YELLOW TRUMPET DAFFODILS.

Varieties with Yellow or Primrose-coloured Trumpet and perianth of same shade or lighter (not white).

*Abscisus* (4), x, a native of the French per doz. each.
Pyrenees, perianth sulphur-yellow, long rich s. d. s. d. yellow trumpet, the latest flowering of all Trumpet Daffodils, and valuable to naturalise in quantity in grass, woodlands, etc., ht. 12 in.

§ Emperor (3), xx, perianth deep primrose, trumpet rich full yellow, very large flower; should be grown in flower-beds and borders and naturalised in grass, and is one of the best for cutting, ht. 21 in. ... Large round bulbs, per 1000, 70/-; per 100, 7/6

§ Excelsior, xx, new, in form closely resembling Golden Spur, but the yellow colouring is richer and deeper; a handsome flower and good forcing ... per 100, 12/6

† George Philip Haydon (3). See New Seedling Daffodils, page 10, each £12 12/.

† Glory of Leiden (4), xx, a very bold Giant Trumpet Daffodil, the flowers staring one full in the face, in flower-beds and borders very effective; trumpet rich full yellow, perianth pale yellow, sometimes with deeper yellow markings, ht. 14 in. First-Class Certificate R.H.S. ... per 100, 35/-

§ Golden Bell (1), xx, broad light yellow twisting perianth, large bold golden trumpet, with open finely frilled mouth, tall grower and remarkably free bloomer, ht. 14 in. First-Class Certificate R.H.S. ...

§ Golden Spur (1), xx, native of the Netherlands, perianth large and spreading, trumpet large and distinctly lobed, deep rich self-yellow; an early forcing and a handsome Daffodil for borders and grass, free seeder, ht. 18 in. ... per 100, 9/6

Extra strong bulbs, each giving 2 to 3 flowers 15/.

† Hamlet (3), xxx, new 1905, a very handsome flower after the style of Emperor, and having a large broad flat primrose perianth and a well-formed bold yellow trumpet, ht. 18 in. ...

§ Henry Irving (1), xxx, a native of the Netherlands, broad spreading yellow perianth, large yellow trumpet, very handsome, excellent for forcing, also for cultivation in grass or borders, ht. 18 in. ... per 1000, 70/-; per 100, 7/6

† Hon. Mrs. Jocelyn (4), xxx, new 1901, raised by the Rev. G. P. Haydon, flower large and of elegant form, of a rich uniform golden-yellow colour, with large wavy perianth and longer trumpet, a very straight crown, handsome free bloomer, of good constitution, ht. 15 in. ...

Johnstoni Queen of Spain. See Johnstoni Section, page 21.

† King Alfred (2), xxx, a remarkably handsome Daffodil which we can strongly recommend; flowers of large size, great substance, and refined finish; colour a uniform intense rich golden; trumpet large and of elegant form, with open deeply frilled mouth; very tall vigorous grower and free bloomer; foliage of a handsome bluish shade, ht. 24 in. First-Class Certificate R.H.S., March 28th, 1899. Award of Merit Royal Botanic Society, April 18th, 1901. At the Midland Daffodil Society, April 18th, 1905, we were awarded for this Daffodil the PREMIER PRIZE ...

† Lady Helen Vincent (3), xxx, a large trumpet variety of highly refined form and of good substance, colour of a uniform soft clear yellow, ht. 13 in. Award of Merit R.H.S...

† Lord Roberts (3), xxx, a grand Trumpet Daffodil, raised at our Survolton Nurseries; flowers of enormous size, golden-yellow, with broad massive perianth and noble trumpet; tall grower and free bloomer, with strong constitution, height 23 in. Awarded First-Class Certificates by the R.H.S., Midland Daffodil Society, Cornwall Daffodil Society, 1901, and Plymouth, April 11th, 1905 .... each 1 ft. 12.

Major (3), a poor flower and shy bloomer, discarded. Golden Spur recommended instead.

§ Maximus (2), xxx, uniform rich deep golden-yellow, perianth elegantly twisted, flower large and graceful, ht. 18 in.; one of the deepest yellow Trumpet Daffodils; it delights in a stiff moist soil ... per 100, 8/6

Extra fine stock ...

† Mikado (3), xx, new 1905, flower of M. J. Berkeley form, but much finer; colour golden-yellow, with graceful twisted perianth, and very large trumpet with wide open mouth, deeply flanged at brim; very showy and free flowering, ht. 15 in. ...

§ Mikado (3), xx, new 1905, flower of M. J. Berkeley form, but much finer; colour golden-yellow, with graceful twisted perianth, and very large trumpet with wide open mouth, deeply flanged at brim; very showy and free flowering, ht. 15 in. ... 24 0...3
Yellow Trumpet Daffodils—continued.

| Minimus, true (1), the smallest and daintiest Trumpet Daffodil, flowers rich full yellow; height about 3 inches, flowering outdoors in February; a dainty little gem for edgings, nooks on rock-work, or to naturalise in grass, and for pot culture. It likes a peaty soil. In 1887, during a tour in Spain, our Mr. Peter Barr found this charming miniature Daffodil growing freely amongst gorse, with a south aspect. For our annual supply we have to depend upon collected bulbs which are taken up while the foliage is green: in consequence there is a possibility that all the bulbs may not bloom the first season, but a good proportion will. | per 1000, 10/-; per 100, 10/6
|——|——|——|——|——|
| 1 | 6 | 0 | 2 |

*Minor, true (1), full yellow, divisions of perianth gracefully twisted, trumpet distinctly lobed, valuable for edgings and rockwork, very early, ht. 7 in. | per 1000, 32/6 |
|——|——|——|——|——|
| 4 | 6 | 0 | 5 |

M. J. Berkeley, omitted, being so shy a bloomer.

†Monarch (3), xxx, raised at our Surbiton Nurseries, a noble flower, and one of the most refined of all the Giant Golden Trumpeters; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy, ht. 20 in. | 55 | 0 | 5 | 0 |

*Nanus, true (1), rich full yellow, very dwarf and early, a gem for edgings; in March “its small flowers thickly bespangle the ground like golden stars,” ht. 6 in.; it has now become rather scarce. Lobularis is generally sold for Nanus, it is however quite a distinct variety and will be found offered on page 16. | 5 | 6 | 0 | 6 |

†Obvallaris (Tenby Daffodil) (1), xx, this very distinct variety has all the fine qualities of Trumpeter, perianth rich and trumpet full yellow, very early; it is best grown in partial shade, and is a fine variety for naturalising in grass; it also forces well; ht. 12 in. Strong bulbs, per 1000, 50/-; per 100, 5/6. | 100 | — |

$†Othello (5), xx, new 1905, primrose perianth, broad and campanulate, trumpet rich yellow, of good substance; dwarf sturdy grower, ht. 10 in. | 12 | 6 | 1 | 3 |

†Phil May (3), new 1904, large bold yellow straight trumpet, with paler yellow broad perianth, strong sturdy grower. | 48 | 0 | 4 | 3 |

†P. R. Barr (4), xx, perianth primrose, trumpet rich full yellow of fine quality and form, very handsome, a sturdy grower and free bloomer, ht. 16 in. This is a most valuable variety for cutting, and we strongly recommend it for planting largely in flower-beds and borders, and in grass, etc. Extra strong selected bulbs, per 1000, 95/-; per 100, 10/6. | 1 | 6 | — | 2 |

Queen of Spain. See Johnstoni Section, page 21.

†Ranger Johnson (4), xx; a beautiful refined flower of uniform soft yellow, trumpet large and of good substance, elegantly flanged at mouth, ht. 15 in. | — | — | 7 | 6 |

†Ray Smith, xx, flowers a uniform rich yellow, distinct and elegant in form and of good substance, perianth gracefully twisted and tapering to a point; a free bloomer and strong grower with broad deep glaucous blue foliage, very handsome, ht. 16 in. Extra strong selected bulbs, per 100, 45/-. | 6 | 0 | 0 | 7 |

†Rev. D. R. Williamson, new 1904, xx, clear rich yellow with long handsome trumpet, a bold and noble flower. Raised at our Surbiton Nurseries. | 48 | 0 | 4 | 6 |

†Rugilobus (2), x, native of Lincolnshire, large primrose perianth, large yellow trumpet, in the Emperor of Way, but smaller and earlier, ht. 15 in. | per 1000, 42/-; per 100, 4/6 |
|——|——|——|——|——|
| 0 | 8 | — | — |

†Santa Maria (1), xxx, found by Mr. P. Barr in Spain, very rich deep orange-yellow, perianth elegantly twisted, a remarkably distinct and charming early flower, ht. 14 in. | 5 | 6 | 0 | 6 |

†Sprightly (2), xx, flowers of medium size, brilliant deep golden-yellow, trumpet open at mouth and prettily frilled, foliage deep blue-green; a strong, free grower, and a handsome showy bedding variety, ht. 15 in. | 7 | 6 | 0 | 8 |

†Spurius (1), xx, native of the Netherlands, self-yellow, with a broad, imbriated floored perianth and a large expanded trumpet; forces well, per 1000, 55/-; per 100, 6/-. | 10 | — | — | — |

†Tenby Daffodil (1). See Obvallaris, above.

†Van Waelejen’s Giant (3), xxx, the largest of all Trumpet Daffodils, flowers of immense size, perianth primrose and of rather campanulate form, trumpet bright yellow with very large open mouth, flanged at brim, very tall. Each £3 10s. | 8 | 6 | 0 | 9 |

BICOLOR TRUMPET DAFFODILS.

White-Winged Bicolor Varieties.

†Apricot (3), xx, a very beautiful and striking novelty, presenting quite a new shade in Trumpet Daffodils. The perianth is white, while the long straight trumpet opens soft primrose passing to a rosy apricot-buff, and exhales a delightful fragrance resembling that of violets, ht. 16 in. AWARD OF MERIT R.H.S., FIRST-CLASS CERTIFICATE. Birmingham, 1901. | 18 | 6 | 1 | 9 |

†Banzai. See New Seedling Daffodils, page 9. | each £15 15s. |

†Sabrina. See New Seedling Daffodils, page 13, each £2 2s.

*Scoticus (Scotch Garland Lily) (1), x, perianth white, trumpet yellow, elegantly serrated, a charming dwarf Daffodil, very early; it is quite unsuitable for planting in the cultivated border, and should only be used for naturalising in grass, as it does not flower freely until established. per 1000, 40/-; per 100, 4/6 0 8 .. —

‡Sentinel, xx, broad erect spreading perianth of a pure white, with short clear yellow trumpet, expanded and flanged at mouth, strong grower, flowers just tipping the foliage; a charming and effective variety for bedding, ht. 15 in. ........................................ per 100, 30/- 4 3 .. 0 5

Seraphin. See New Seedling Daffodils, page 13, each £2 5s.

†Victoria (2), xx, a grand Trumpet Daffodil, introduced by us in 1897; flowers large, bold, and erect, with creamy white perianth of remarkable breadth and good quality, trumpet clear rich yellow, large, broad, and of great substance, beautifully flanged and frilled at mouth, a very free strong grower. Under glass the perianth is of a snowy whiteness. It forces easily and may be had in flower earlier than any other bicolor, ht. 18 in. Award of Merit R.I.L.S.; Certificate of Merit R.B.S.

per 1000, 80/-; per 100, 8/6 1 3 .. —

Specially selected bulbs for forcing 12/6 1 9 .. 0 2

†Weardale Perfection (4), xxx, this fine Daffodil still ranks among the Giant Trumpets, and at the same time as a flower of refined beauty; it has a large white perianth, and a soft primrose trumpet, of immense size, ht. 24 in. It has been AWARDED A FIRST-CLASS CERTIFICATE by the R.I.L.S., and the PREMIER PRIZE by the Midland Daffodil Society. Some blooms of this Daffodil have been exhibited measuring 5 inches across .......................................................... 84 0 .. 7 6

**WHITE TRUMPET DAFFODILS.

Silvery White and Pale Cream-Coloured Varieties.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 3). The varieties marked * thrive best in the shade of deciduous trees, naturalised in shady grassy nooks, or on grassy slopes facing north.

§†Albicans (2), xx, white perianth and long primrose trumpet passing to white, elegantly recurved at brim, a strong grower and free bloomer, ht. 14 in. .. per 100, 10/6

†Alice Knights (1), xxx, raised at our Surbiton Nurseries, the earliest of white Trumpet Daffodils and a beautiful flower; perianth white, trumpet creamy white of elegant form with prettily frilled open mouth; the whole flower is of great substance and lasts well, whether cut or on the plant; of good constitution and a free bloomer, ht. 12 in. Award of Merit R.I.L.S., April 11th, 1905, and R.B.S., March 21st, 1906, .. — 21 0

†Atalanta, xxx, new 1904, broad pure white perianth, trumpet cream, prettily fluted, a very elegant flower of fine substance. Award of Merit R.I.L.S. .. each £9 9s.

**Indamora.** See New Seeding Daffodils, page 11. each £ 5 5s.

†Lady Audrey (4). See New Seeding Daffodils, page 11. each £ 1 10s.

†Lady of the Snows (4), xxx, new 1905, large and beautiful flower, perianth solid white, trumpet of fine form, white and elegantly frilled at mouth. Award of Merit Birmingham, April 18th, 1905. each £ 9 9s.

§Lady Sybil (1), xx, raised at our Surbiton Nurseries, flowers of medium size and a uniform primrose colour; trumpet short with open mouth, prettily flanged, and shaded silver on the inside, giving a very pretty effect, ht. 11 in. 7 6...0 8

†L'innocence (2), xx, perianth white, trumpet broad, pale primrose passing to white, ht. 20 in. 10 6...1 0

**Lola.** See New Seeding Daffodils, page 11. each £ 6 6s.

†Loveliness. See New Seeding Daffodils, page 11. each £ 7 7s.

†Madame de Graaff (4), xxx, a lovely variety which must always take a prominent position among the pale-coloured Trumpet Daffodils. The perianth is pure white while the trumpet opens a soft primrose shade passing off almost white. Flowers of graceful outline. In addition to being a robust grower and free bloomer, it forces well and makes an elegant pot plant for greenhouse decoration, while in flower beds and borders, or naturalised in grass, few Daffodils are so beautiful. The cut flowers are highly prized by exhibitors, and to cut for vases, ht. 16 in. First-Class Certificate R.I.S. extra strong bulbs 12 £ 6...1 3

§Marchioness of Lorne (2), x, a good strong-growing variety, trumpet creamy white, perianth white, foliage deep blue-green, ht. 12 in. per 100, 12/6 1 9...0 2

†May Queen. See New Seeding Daffodils, page 12. each £ 1 15 15s.

†Mrs. Betteridge (3), xxx, new 1905, a very refined and beautiful snowy white flower, perianth well formed, broad and imbricated, with a distinct fluting on surface, trumpet of model form with elegantly flanged and fluted brim, ht. 12 in. —...17 6

§Mrs. Camm (4), xx, perianth white and elegant, trumpet cream, a lovely flower of great substance, lasting well when cut, ht. 12 in. First-Class Certificate R.I.S. per 100, 32/6. 4 6...0 5

†Mrs. George H. Barr. See New Seeding Daffodils, page 12. each £ 1 7s.

†Mrs. Thompson (2), x, pure white, trumpet elegantly frilled, large and very handsome, early, a strong grower and free bloomer, ht. 14 in. per 100, 14/6. 2 0...0 3

†Mrs. Vincent (4), xx, of rare beauty, perianth and trumpet white, of great substance and perfect form, a good grower, ht. 12 in. 18 0...1 9

*Moschatus of Haworth (The Snowy White Daffodil of Spain) (1), variable in size of flower. A charming dwarf variety, and a gem to naturalise in grass, delighting in partial shade and on grassy slopes facing north, ht. 6 in. per 100, 10/6. 1 6...0 2

*Pallidus Pracox (1), a native of the Pyrenees, variable in size and shade, from pale straw-colour to white, very early and beautiful, ht. 12 in. A few Narcissus variformis may sometimes be found amongst it, as the two are found growing near to one another in their native habitat. Grow where possible on moist grassy slopes facing north, and on no account give any manure per 1000, 60/; per 100, 6/6. 1 0... —

Bulbs of larger size 8/6 1 3... —

**Peter Barr.** See New Seeding Daffodils, page 12. each £ 1 12s.

†Princess Ida (2), xx, white perianth, elegant white trumpet, with brim flanged and edged yellow; a charming variety either for border or pot culture; an excellent forcer, ht. 14 in. per 100, 25/ 3 6...0 4

†Queen Isabella (2), xx, new 1905, having a pointed white perianth and an elegant cream-coloured trumpet prettily frilled at mouth, ht. 12 in. 25 0...2 3

§Sir Stafford Northcote (2), x, silvery white perianth, long pale sulphur trumpet, free bloomer, good for grass and borders, ht. 15 in. per 100, 10/6. 1 6...0 2

†Snowflake (2), xx, white trumpet tinged apricot, passing off silvery white, distinct and handsome, holding its head well up, a good grower, ht. 14 in. Certificate of Merit R.B.S. 8 6...0 9

†Tortuosus (syn. Leda and Samian Belle) (1), xx, perianth pure white, twisted, somewhat shorter than the trumpet, which is pale sulphur passing to white, a handsome fragrant flower, ht. 15 in. per 100, 40/ 5 6...0 6

§William Goldring (3), xx, long snow-white tapering perianth, gracefully drooping over the primrose trumpet, ht. 10 in. Its graceful form suggests the name of "Swan's Neck Daffodil"; of good constitution per 100, 10/6. 1 6...0 2

§W. P. Milner (2), x, a charming free-flowering variety, with dainty sulphur-coloured flowers, valuable for filling small beds or for edgings, and very effective in grass, ht. 11 in.; when forced it is very pretty, the flowers coming a pure white per 100, 12/6. 1 9...0 2
NARCISSUS JOHNSTONI.
Natural Hybrid of Ajax x Triandrus, with reflexing perianth, and tube longer than it is wide.

§**Queen of Spain** (2), xxx, found by Mr. Peter Barr in Spain. One of the most beautiful, distinct, and graceful Daffodils in cultivation; and unsurpassed either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in coconut fibre and charcoal, or damp pebbles and gravel, and grown thus affords an artistic decoration for the sitting-room. Awarded FLORAL CERTIFICATE at the Daffodil Conference, 1896. As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, there is a possibility that all the bulbs may not bloom the first season, but a fair proportion will.

1st size bulbs, per 100, 17½ 2 6.0 3
Smaller bulbs for large plantings, to naturalise, per 100, 12½ 1 9. —
A few extra large bulbs £2 25

Anne Holloway. See New Seedling Daffodils, page 9 each £1 5s.
Dainty. See New Seedling Daffodils, page 10 each £2 25.
J. T. Bennett-Poe. See New Seedling Daffodils, page 11 — 18 6
Zoe. See New Seedling Daffodils, page 13 each £1 5s.
(The beautiful new hybrids Countess Grey, Cyprian, Countess Visconti, Count Visconti, Earl Grey, Eleanor Berkeley, etc., belong to this section, but they are not yet in commerce.)

NARCISSUS CYCLAMINEUS.
The Yellow Cyclamen-flowered Daffodil.

This beautiful little Daffodil was re-introduced into cultivation in 1897 by A. W. Tait, Esq., of Ophirns, after being lost sight of for 200 to 300 years.

Cyclaminoous (1), this is the earliest of all Daffodils and is a charming elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed as in a Cyclamen. A valuable little species for pot-culture, edgings, rockwork, and to naturalise in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil, ht. 6 in., FIRST-CLASS CERTIFICATE R.H.S. As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, they may not bloom the first season per 100, 15/— 2 3.0 3
A few extra straig bulbs 3 6.0 4

NARCISSUS BULBOCODIUM
(Corbularia).
The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. See Cultural Notes, pp. 3 to 5.

Large Sulphur Hoop Petticoat (Bulbotodium) per doz. each citrinum) (3), native of the Pyrenees, very beautiful pale citron-yellow, ht. 6 to 8 in.; delights in a dampish sandy peat soil. The bulbs having to be collected while in growth each year, will not all bloom the first season — per 1000, 60/—; per 100, 6/— 1 0. —
Narcissus bulbocodium—continued.

†White Hoop Petticoat (Bulbocodium monophyllum or Clusius) (1), native of N. America, winter-flowering, showy white flowers of exquisite beauty produced in winter; pot in pots, in frames, or at the foot of hot dry walls, and as soon as signs of growth are seen, give water freely, ht. 6 in. A good proportion of the bulbs usually flower the first year. (See illustration page 21). per 100, 12/- Extra strong bulbs 15/-

†Large Yellow Hoop Petticoat (Bulbocodium conspicum) (4), rich golden-yellow, ht. 6 in.; prefers a dampish sandy peat soil. A fair proportion of the bulbs flower the first year per 100, 15/-

†Early-flowering Yellow Hoop Petticoat (2), found in Spain by Mr. Peter Barr, rich golden-yellow, very beautiful, flowering outdoors from February, ht. 6 in.; delights in a dampish sandy peat soil. A fair proportion of the bulbs should bloom the first season per 100, 7/6

†Miniature Early Yellow Hoop Petticoat, native of Portugal, bright yellow, early and very pretty, a rare species, ht. 3 in.; prefers a sandy peat soil. A fair proportion of the bulbs should bloom the first season per 100, 6/0

Narcissus Backhousei.

Hybrids of Ajax x Tazetta, with characteristic Trumpet-shaped Crown. Suitable for pot culture, beds, borders, or naturalisation. per doz. each.

†William Wilks (3), xxx, closely imbricated spreading primrose perianth, and striking orange-yellow trumpet, with frilled brim, ht. 15 in. per 100, 7/6

Narcissus Tridymus.

Hybrids of Tazetta x Ajax bearing generally two to three flowers on a stem, and sweetly scented.

§Cloth of Gold (4), xx, the brightest coloured of the Tridymus section, each stem bearing three to five sweetly scented flowers, with rich yellow perianth and bold deep golden crown; a robust grower, and fine bloomer, ht. 15 in. per 100, 6/0

§Miss White (3), xx, each stem bearing three to four elegant silvery white flowers, ht. 21 in. per 100, 6/0

§St. Patrick (4), xx, remarkably striking, bearing three flowers on a stem, campanulate soft yellow perianth, crown rich deep golden, flanged at mouth, a fine handsome sweetly-scented variety, robust grower and fine bloomer per 100, 7/6

§S. A. De Graaff (3), xx, a large bold well-imbricated yellow perianth and fine yellow crown, ht. 12 in. per 100, 15/-

§The Twins (3), xx, a pretty two-flowered variety, perianth creamy white, bold yellow crown of fine substance, violet-scented, ht. 15 in. per 100, 21/-

Double Trumpet daffodils.

All the Double Trumpet Daffodils thrive admirably when planted in grassland and allowed to remain undisturbed. They are seen to great advantage when planted in clumps in permanent borders, and as pot-plants they are very attractive (several bulbs in a pot).

†Capax Plenus (syn. Eystettensis), Queen Anne's Double Daffodil (1), xxx, native of Ireland, beautiful soft pale lemon-coloured flowers, consisting of six rows of petals, symmetrically arranged over each other in the form of a star, ht. 7 in. per 100, 8/0

†Curneus Plenus (The Old Double White Trumpet Daffodil) (3), xxxxx, native of England, flowers of exquisite beauty; now very rare. For successful culture plant in shade in good virgin pasture-loam, avoiding manure, and leave it to become established; in grassland this lovely Daffodil seems most at home, ht. 10 in. per 100, 48/0

†Lobularis Plenus (The Dwarf Double Sweet-Scented Daffodil) (2), xx, native of the Netherlands, large double yellow flowers, which are delightfully sweet-scented, ht. 10 in. per 100, 21/6

†Minor Plenus (Rip Van Winkle) (2), xx, native of Ireland, small double yellow flowers with curiously twisting petals, rare, ht. 9 in. per 100, 3/0

†Plenissimus (Parkinson's Rose-flowered Daffodil) (3), xx, large rose-shaped rich yellow flowers, very double and having several centres, delicately scented, ht. 14 in. per 100, 6/0

†Pseudo-Narcissus Plenus (Gerard's Double-Flowered English Lent Lily) (2), xx, a charming small Double Daffodil, with white and yellow petals interspersed, rare, ht. 9 in. It is best naturalised in grass. per 100, 6/0

†Scoticus Plenus (Double Scotch Garland Lily) (2), xx, a very charming showy Double Daffodil, with white and golden petals interspersed, ht. 12 in., per 100, 30/- per 100, 4/0

§†Telamonius Plenus (Wilmer's Great Double Golden-yellow Daffodil) (2), xx, the large Old Double Yellow Trumpet Daffodil; valuable for grouping in beds and borders, also for forcing per 100, 65/- per 100, 7/- Good flowering bulbs at 45/- at 5/-
GROUP II.—MEDIO-CORONATI.

Chalice-Cupped Daffodils or Star Narcissi, Etc.

(Quelitia, Philogynne, Ganymedes, Etc., of Salisbury, Haworth, and Herbert; Peerless, Nonsuch, Etc., of Parkinson.)

The varieties of this group are hybrids, excepting Triandrus and Juncifolius, which are species. *Incomparabilis* and *Barrii* are the result of garden crosses between yellow Trumpet Daffodils and Narcissus Poeticus; *Leucii*, a garden cross between White Trumpet Daffodils and Poeticus; *Nelson*, the result of a Trumpet Bicolor var. crossed with Poeticus; *Bernardi*, a natural cross between Abscissus and Variiformis (Trumpet Daffodils) and Poeticus; *Macleaii*, an ancient hybrid, origin unknown, but it may be a cross between a Trumpet Bicolor and a Tazetta or Polyanthus Narcissus; *Odorus*, an ancient hybrid between a Trumpet Daffodil and Narcissus Jonquilla.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see page 4).

NARCISSUS INCOMPARABILIS.

DISTINGUISHING CHARACTER.—Depth of crown or cup more than one-third and up to three-quarters the length of the perianth segments (petals).

All these make charming pot-plants, while the cut flowers are of great value in decoration. For beds and borders they are very showy, and naturalised in grass few flowers are so graceful and effective. It is well to bear in mind that the depth of colouring in the cup varies according to season. per dozen each.

NARCISSUS "BEDOUIN."

A grand new Daffodil, exhibited before the Royal Horticultural Society, London, April 14th, 1908, and considered the finest flower in the Show. Exhibited also before the Royal Caledonian Society, Edinburgh, April 15th and 16th, 1908, where it was unanimously awarded a First-Class Certificate, and attracted a great deal of attention. (See page 9.)
Narcissus Incomparabilis—continued.
§† Dandy Dick (2), xx, bold showy flower with broad shortish primrose perianth of good substance, and large bold bright yellow crown, open and prettily crimped at brim with a showy deep orange-red margin .................................................. 72 0..6 6

§ Dorothy Yorke, xx, perianth white, large expanded crown, bright yellow stained towards mouth orange-scarlet

Fireflame. See New Seedling Daffodils, page 10 .................................................. 6 6..0 7

§† Frank Miles (3), xx, large handsome flower, soft clear yellow, with gracefully twisted perianth, exceedingly effective in masses and excellent for cutting, ht. 22 in. per 1000, 70/-; per 100, 7/6 .................................................. 10 6..1 0

§ Lucifer, true (2), xxx, raised by “St. Brigid,” large handsome white perianth; cup an intense glowing orange-red, colour lasting well in the sun, very striking, strong grower and free bloomer, ht. 18 in. Awarded First-Class Certificates by the R.H.S. and Midland Daffodil Society .................................................. 22 6..2 0

§ Lutworth, xx, pure white perianth, cup bright orange-red, a charming and beautiful flower; of dwarf habit, ht. 14 in First-Class Certificate R.H.S. .................................................. 5 6..0 6

§ Mabel Cowan (4), xx, perianth white, cup broadly margined orange-scarlet, a beautiful flower of good substance, late flowering, ht. 20 in. Awarded a Floriferous Certificate at the Daffodil Conference, 1896 .................................................. per 100, 7/6 1 3...0 2

† Nestor. See New Seedling Daffodils, page 12 .................................................. 15 0

§ Perfectus (4), xx, a flower of great substance and charming symmetry, having a well-formed stiff white perianth and expanded canary-yellow cup faintly tinged orange, ht. 21 in. per 100, 35/- 5 0..0 6

§ Princess Mary (3), xx, broad and spreading creamy perianth, large and much-expanded cup suffused orange, a flower of beautiful form, ht. 16 in. First-Class Certificate R.H.S. .................................................. per 100, 12/6 1 9...0 2

§† Queen Bess (1), xx, pure white perianth, with large clear light yellow cup, much expanded, ht. 15 in.; a very useful and valuable variety, being one of the earliest of the Chalice-cup Daffodils .................................................. per 1000, 42/-; per 100, 4/6 0 8... —

§ Queen Catherina (2), xx, perianth cream-coloured lined primrose and reflexing, cup large and open, prettily crinkled, bright yellow suffused orange, fine deep blue-green foliage, strong grower and free bloomer, ht. 18 in.; valuable for bedding, often producing two flowers on one stem .................................................. per 100, 25/- 3 6..0 4

§ Queen Sophia (3), xx, perianth sulphur, large spreading frilled cup, heavily stained orange-scarlet, of great beauty; it delights in a good stiff fibrous loamy soil, ht. 18 in. First-Class Certificate R.H.S. .................................................. 10 6..1 0

§ Red Star (5), xx, creamy white perianth elegantly arched, long straight cup stained brilliant red, the colour lasting well in the sun; a very showy handsome flower and free bloomer, ht. 14 in. .................................................. per 100, 60/- 8 6..0 9

§ Semi-Partitus (4), xx, perianth soft pale primrose, cup primrose, deeply lobed, a very lovely and interesting variety, ht. 17 in. .................................................. 4 6..0 5

§† Sir Watkin (2), xxx, a Giant Chalice-cupped Daffodil, very large handsome bold flower, perianth primrose, cup yellow, very slightly tinged with orange, ht. 21 in.; valuable for filling flower beds, massing in borders, or planting in grass; it forces well, and is greatly prized for cutting .................................................. per 1000, 60/-; per 100, 6/6 1 0... —

Extra strong selected bulbs 80/-; 9/- 1 4..0 2
Narcissus Incomparabilis—continued.

†Steadfast, xxx, flower of fine substance, with well imbricated white perianth and cylindrical rich yellow crown, bold and handsome per doz. each.  
2s. 6d. 2s. 6d.  
§†Stella (3), X, white perianth, cup yellow, a bold, showy flower, a charming variety for naturalising in grass per 1000, 21/-; per 100, 2/3  
§†Stella Superba (3), xxx, a grand bold flower, far superior to Incomparabilis Stella, flowers more than twice the size, with large clear white spreading perianth and a showy yellow cup; it is a strong grower and excellent for cutting, having a long stem, ht. 20 in. per 1000, 65/-; per 100, 7/-  
§†The Rival. See New Seeding Daffodils, page 13  
§†Titan (2), xx, native of England, being the single form of Butter and Eggs, perianth yellow, cup margined orange-red, flower large and well formed, very showy, ht. 18 in.  
§†Vesuvius, xx, sulphury white perianth, cup stained glowing orange-red, a bright showy flower; good grower and profuse bloomer, ht. 15 in. per 1000, 21/-  
†White Wing (4), xx, beautiful round white perianth with clear yellow crown, ht. 14 in. Award ofMerit R.I.S.  
§Will Scarlett, we consider this variety is worth xxxx on account of the remarkable fiery orange-red colouring of the cup, which opens widely at mouth and is elegantly crimped, perianth creamy and rather weak; a very striking flower. First-Class Certificate R.I.S.  

NARCISSUS INCOMPARABILIS, DOUBLE.

The Double Rose-flowered Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (3 to 6 bulbs in a pot) they are very charming, while in beds, borders, or naturalised they make a most effective display.

§†Apricot Phœnix (3), xxx, new 1905, a great acquisition to the Double Rose-shaped Daffodils; the flowers are large and of great beauty, being fully double, creamy white shading to a pretty apricot-buff at centre per doz. each. 
6s. 6d. 6s. 6d.  
§†Argent (4), xx, a beautiful cross between Telamonia plenus and Poeticus ornatus, bearing elegantly formed star-shaped semi-double flowers with creamy white petals and yellow centre, strong robust grower, ht. 18 in.  
§†Butter and Eggs (2), xx, native of England, large double light yellow rose-shaped flowers, orange-coloured towards the centre, very effective in clumps and masses, ht. 17 in. 
per 1000, 35/-; per 100, 4/-  
Extra strong bulbs per 1000 45/-; per 100, 5/-  
§†Codlins and Cream (syn. Sulphur Phœnix) (3), xxx, large double white rose-shaped flowers with sulphur centre, very chaste and beautiful; much prized for bouquets, vases, etc., ht. 15 in. 
per 100, 12/6  
"Extra Fine Stock", 17/6  
2s. 6d.  
§"Eggs and Bacon" (syn. Orange Phœnix) (3), xxx, large double rose-shaped flowers, white with rich reddish orange centre, ht. 17 in. per 100, 6/6 
1 0.0 2  
§"Golden Rose" (2), xxx, flowers very large and round, rich light yellow with orange-golden centre, very double, handsome and showy, ht. 17 in.  
§"Plenipo, xxx, a very fine cross between Telamonia plenus and Poeticus, plants of sturdy erect habit, bearing freely large handsome double flowers of elegant form, showing three shades of colour in each flower—yellow, primrose and white. A valuable border or pot plant.  
§"Primrose Phœnix (3), xxx, a valuable addition to this section of Double Daffodils; the large double rose-shaped flowers are of a beautiful soft lemon shade; much prized for vases, ht. 20 in. Award ofMerit R.I.S. See illustration page 30  
§Semi-Partitus Plenus, xx, a very distinct variety, flowers of a soft lemon yellow, with numerous pointed petals, rare
NARCISSUS BARRII.

DISTINGUISHING CHARACTER.—Depth of cup one-quarter to one-third the length of the perianth segments (petals). The beauty of these Narcissi renders them of great value for indoor decoration (3 or 5 bulbs in a 5-inch pot), while for beds, borders, naturalisation, and as cut flowers they are highly prized.

†Albatross (4), xxx, a large spreading Eucharis; per doz. each, like flower, perianth white, cup pale eiton-yellow, prettily frilled and conspicuously edged orange-red, beautiful, ht. 18 in. Awarded First-Class Certificate R.H.S. 18 6.1 9

Barbara Holmes (4), xxx, a remarkably pretty variety, flower of elegant form, perianth white, cup broad and short, yellow conspicuously edged bright orange-scarlet, ht. 20 in. Award of Merit R.H.S., 1903 10 6.1 6

†Broadwing, perianth white, cup orange, beautiful. Award of Merit Birmingham, 1903... 10 6.1 6

§†Conspicuous (4), xxx, a flower of great beauty and refinement, and a favourite with all, large broad spreading yellow perianth, broad short cup, conspicuously edged bright orange-scarlet, ht. 20 in. First-Class Certificate R.H.S. We can highly recommend this variety to every one, as it is certainly a Queen amongst Chalice-Cupped Daffodils, and lasts longer in water when cut than almost any other variety; it is a robust strong grower and a very free bloomer per 1000, 56/-; per 100, 3/6. 0 6... 0 10... —

Cossack. See New Seeding Daffodils, page 10... each £5 5s.

§†Crown Prince (4), xxx, perianth white, cup large and heavily stained orange-red, very large handsome flower, sturdy grower, ht. 20 in. 5 6... 0 6

§Cupid (5), xx, a very late bloomer, and the last of the Barrii section to flower; perianth white, cup yellow, flushed apricot, sweet-scented, ht. 18 in. 6 6... 0 7

†Dorothy E. Wemyss (4), xxx, large white perianth, with canary-yellow cup, conspicuously edged orange-scarlet, very beautiful, late flowering and a strong grower, ht. 22 in. One of the finest of the Barrii section. Award of Merit R.H.S. and Florals per 100, 90/- 12 6... 1 3

Fair Maiden. See New Seeding Daffodils, page 10... — 12 6

§†Flora Wilson (4), xx, white perianth, cup deeply stained orange-scarlet, a very striking and beautiful flower, delicately scented, ht. 20 in. per 100, 15/- 2 3... 0 3

Geraldine. See New Seeding Daffodils, page 10... each £7 7s.

§†Glitter (4), xx, new 1906, a beautiful rounded flower of firm substance, with rich yellow broad perianth, cup heavily edged brilliant orange-red, very showy. Award of Merit Birmingham, 1907 8 6... 0 9

Isis. See New Seeding Daffodils, page 11... each £12 12s.

Joan of Arc. See New Seeding Daffodils, page 11... each £2 2s.

†Sensation (4), xx, large pure white perianth, cup canary, conspicuously edged orange-scarlet, beautiful, ht. 20 in.; the flowers should be cut when half open to develop in water, as the fine colouring on the cup is soon destroyed by a hot sun; where possible, this variety should be grown on a still loamy soil. per 100, 30/- 4 0... 0 5

§Siddington (4), xx, fine yellow petals, handsome open cup, broadly margined orange, very beautiful and remarkably free flowering, generally producing two blooms on a stem, ht. 18 in. per 100, 21/- 3 0... 0 4

Sunrise, each 10s. 6d.; Torchlight, each 21s. See New Seeding Daffodils, page 13.
NARCISSUS LEEDSII.

The Silver-White Fragrant Star, or Eucharis-flowered Narcissi.

Comprising the white and sulphur-cupped Incomparabiles and Barril forms, all with pure white perianth segments (petals).

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, when naturalised in grass they resemble a multitude of silvery white stars.

§Leedsii—type (2), silvery white, starry, sweet-scented, ht. 15 in. ............... per 1000, 25/-; per 100, 3/- o 5—

†Agnes Harvey (4), xxx, new 1902, a beautiful hybrid, perianth snow-white, cup of exquisit form, pure white sometimes flushed soft apricot, one to three blooms on a stem, slightly drooping, very beautiful, ht. 13 in. AWARD OF MERIT R.H.S., 1902, Plymouth, April 12th, 1904, and R.B.S., April 18th, 1906 — 12 6

§Amabilis (2), xx, silvery white with long cup, sometimes tinged apricot, a very elegant flower, ht. 13 in. per 100, 42/-; per 100, 4/6 o 8—

†Amazon, xxx, a remarkably handsome flower of fine form and great substance, perianth pure white, cup canary, a strong grower and free bloomer often coming with two flowers 60 o...5 6

†Ariadne (3), xxx, a flower of refined beauty and the admiration of all who have seen it; perianth white, cup ivory-white, very large, saucer-shaped, wide and spreading, prettily frilled at margin, a striking flower, lasting long in bloom, ht. 16 in. AWARD OF MERIT Birmingham, 1902; Truro, April 8th, 1904; Plymouth, April 12th, 1904; R.H.S., March 28th, 1905. — 36 0...3 3

§†Beatrice (3), xx, perianth of fine campanulate form, cup globular and remarkably elegant; flower is of highest type of beauty and the purest white, ht. 16 in. per 100, 12/6

†Bianca. See New Seedling Daffodils, page 9 1 9...0 2

§†Bridal Flower (3), xxx, flower elegantly drooping, with campanulate snowy white perianth and elegantly fluted spreading cup, snowy white, shaded green in centre, very beautiful, ht. 12 in. —...3 6

†Bridesmaid (3), xx, new 1901, perianth pure white, fairly broad and campanulate, cup white, slightly margined pale primrose, large and of globular form, prettily crinkled at brim, very beautiful, ht. 20 in. AWARD OF MERIT R.H.S., 1903 per 100, 55/— 7 6...0 8

†Corallina. See New Seedling Daffodils, page 10 each £1 15 s.

Czarina. See New Seedling Daffodils, page 10 each £3 30

†Diana. See New Seedling Daffodils, page 10 each £1 15 s.

§Duchess of Brabant (3), x, perianth white, cup canary, a useful elegant free-flowering variety — per 1000, 21/—; per 100, 2/3 0 4—

§Duchess of Westminster (4), xxx, large spreading pure white tapering perianth and long soft canary cup, tinged orange on first expanding, and passing off almost white, a finely formed handsome flower of delicate colouring. We can strongly recommend this Daffodil for either flower-beds and borders, pots or cutting; the blooms are borne on stout stalks, and the foliage is of a beautiful glaucous blue-green; charming when naturalised in grass, the handsome flowers standing out like large white stars, ht. 18 in. FIRST-CLASS CERTIFICATE R.H.S. — per 100, 30/— 4 0...0 5

†Eileen Mitchell. See New Seedling Daffodils, page 10 each £3 35

†Elaine, xxx, new 1906, perianth broad and silvery white, cup silvery white, small, globular and elegantly fluted, very beautiful, ht. 17 in. FIRST-CLASS CERT. R.H.S. — 15 0

§†Enid, xxx, an improvement on Mrs. Langtry, fine large snowy white perianth, and long straight sulphur-white crinkled crown, beautiful, ht. 20 in. — 12 6

†Eoster. See New Seedling Daffodils, page 10 each £1 12

§Fairy Queen, xxx, perianth pure white, straight creamy white cup, prettily fluted, a strong grower, an exquisite flower of chaste beauty, ht. 16 in. — per 100, 45/— 6 6...0 7

§Fanny Mason (3), x, perianth white, cup canary-yellow, pretty — per 100, 5/6 0 10—

†Gem (3), xxx, a beautifully formed flower, with white cup, of elegant form, and much imbricated silvery white perianth — per 100, 30/— 4 3...0 5

†Hon. Mrs. Barton (3), xx, large broad pure white perianth, cup expanded, and passing from primrose to white, a very distinct handsome variety; a rather delicate grower on some soils, but a lovely flower where it succeeds, ht. 15 in. — per 100, 17/6 2 6...0 3

§†Janet Image. See New Seedling Daffodils, page 11 each £1 10 s.
A beautiful giant Leedsii variety with large spreading creamy white perianth and long straight crown of a bright citron tinged apricot; a vigorous grower and free bloomer, ht. 18 in. (See page 31.)
NARCISSUS "PRIMROSE PHŒNIX."

A beautiful Double Incomparabilis Daffodil recently introduced, and of quite a distinct shade of colour. The flowers are large and of beautiful form, colour a soft self-lemon, ht. 20 in. Award of Merit R.H.S. (See page 26.)
NARCISSUS LEEDSII—continued.

†Katherine Spurrell (4), xxx, broad campanulate white perianth of good substance, cup of a delicate canary colour; flower large and of highest quality; most valuable for cutting, ht. 16 in. .................................. per 100, 25/-

Lord Kitchener. See New Seedling Daffodils, page 11 ................................ each £15 15s.

†Lucia. See New Seedling Daffodils, page 11 ............................................................... 0 15 0

†Madge Matthew (2), xx, large white perianth, elegant white cup, early, foliage deep blue-green, remarkably effective in groups and masses, ht. 18 in. per 100, 21/-

†Maggie May (4), xxx, one of the most beautiful of the Leedsii section; flowers of great size, with white perianth and very large pale citron cup passing to white, beautifully frilled; a fine strong grower, ht. 22 in. First-Class Certificate R.H.S., 1899; First-Class Certificate Birmingham, 1901 .................................................. each £1 15s.

†Maydew. See New Seedling Daffodils, page 12 .......................................................... each £3 3.

†M. Magdaline de Graaff (4), xxx, broad white perianth and much expanded primrose cup, often heavily suffused with a rich orange or terra-cotta shade; usually two-flowered, ht. 17 in. .................................................. per 1000, 50/-; per 100, 8/-

†Minnie Hume (3), xx, large white perianth, cup large and spreading, passing from a fine lemon colour to white; a very handsome flower, equally suitable for pots, borders or to naturalise. †Mountain Maid (3), xxx, new 1901, broad snowy white petals, pure white cup, graceful dropping habit, an exquisitely beautiful flower, ht. 15 in. .................................................. 0 6 … 3

†Mrs. Langtry (4), xxx, perianth white and broad, with large white cup, which opens a pale primrose and passes off white, and in some seasons is elegantly margined canary-yellow, very beautiful; a remarkably free bloomer, each bulb generally producing several flower stems. First-Class Certificate R.H.S. .................................................. per 1000, 30/-; per 100, 3/6

†Peach (3), xxx, a flower of remarkable beauty, and, like Salmonetta, quite a new break in colour; perianth pure white and slightly shouldered, crown long and straight, prettily fluted and of a lovely apricot-orange, ht. 13 in. .................................................. 17 6… 1 8

Penguin. See New Seedling Daffodils, page 12 .................................................. each £2 2s.

†Phyllis, xxx, new 1906, a handsome flower, with broad creamy perianth and straight crown, citron with amber, prettily fluted .................................................. 8 6 … 0 9

†Princess Maud (3), xx, short broad, rather campanulate white perianth, large globular primrose-coloured crown; a beautiful flower. Award of Merit R.H.S. .................................................. 42 0 … 3 9

Queen of the North. See New Seedling Daffodils, page 12 .................................. each £3 3.

†Robbie Jenkins. See New Seedling Daffodils, page 13 ........................................... — … 3 6

†Salmonetta (4), xxx, a remarkably distinct and beautiful new break in the Leedsii section; perianth clear white, almond-shaped segments, cup prettily fluted, well opened and of a beautiful apricot shade passing off peach; a distinct and remarkable colour, ht. 14 in. Award of Merit Birmingham, 1903 .................................................. 48 0 … 4 6

†Silver Moon. See New Seedling Daffodils, page 13 .................................................. each £3 3.

Sirdar. See New Seedling Daffodils, page 13 .................................................. each £1 10s.

Snow Crest. See New Seedling Daffodils, page 13 .................................................. each £5 5.

†Sylvia (4), xx, new 1904, raised by Rev. G. P. Haydon, perianth pure white, gracefully twisted, small white cup flushed peach; a dainty, drooping flower, ht. 18 in. .................................................. 21 0 … 2 0

†The Sisterhood (3), xxx, new 1901, very attractive, perianth white, cup pale buff-prime rose, prettily fluted; generally bearing two flowers on a stem, ht. 20 in. .................................................. 24 0 … 3 0

†Una (4), xxx, a flower of great size, with large creamy white perianth, and long straight crown, of a bright citron tinged apricot; a vigorous grower and free bloomer, ht. 18 in. See Illustration, page 29 .................................................. 12 6… 1 3

†Undine, each 12s. 6d. Venus, each £1 1s. See New Seedling Daffodils, page 13.

†White Eagle. See New Seedling Daffodils, page 13 .................................................. — … 10 6

White Falcon. See New Seedling Daffodils, page 13 .................................................. 36 0 … 3 6

†White Lady (3), xxx, an exquisite flower, with a broad white perianth of perfect form, with a dainty cup prettily crinkled of a beautiful pale canary shade; a very free bloomer. Award of Merit R.H.S. .................................................. 21 0 … 2 0

†White Queen, xxx, resembling a White Sir Watkin, large broad pure white perianth, very large, bold straight cup, pale citron passing to white, with an exquisitely frilled edge; a magnificent flower of the highest refinement; strong sturdy grower. Awarded First-Class Certificate R.H.S. .................................................. each £1 10s.

†White Slave. See New Seedling Daffodils, page 13 .................................................. each £1 5.

NARCISSUS BERNARDI.

A very interesting section, being natural Pyrenean hybrids between the wild Poeticus Narcissus and N. Abyssinicus and N. Variformis; our Mr. Peter Barr proved the origin of this Narcissus on one of his journeys to the Pyrenees, where he found the parents and their hybrid in a wild state.

§Fire Glow (5), xxx, perianth snow-white, cup glowing crimson, colour lasting well in the sun, ht. 12 in. .................................................. per doz. each s. d. s. d

§H. E. Buxton (4), xx, perianth white, cup brilliant orange-scarlet, ht. 15 in. .................................................. 36 0 … 3 5

§I. 10s.
BARR'S DAFFODILS Awarded Five Gold Medals 1908.

NARCISSUS MACLEAEII.

†Macleai (Panza bicolor and Diomedes minor) (4), flowers small, white perianth, yellow goblet-shaped cup, robust and dwarf, a charming little characteristic Daffodil, height about 4 in. ........................................ per 100, 21/- 3 0 0 4

NARCISSUS NELSONI.

(Garden Hybrids of N. bicolor and N. poetics.)

Handsome for indoors, 3 bulbs in a 5-inch pot; beautiful in beds, borders, and for naturalisation. Being rather late flowering they are highly valued for maintaining a succession of bloom. The flowers are of great substance, with snowy white petals, and last long in water when cut.

§†Aurantius (4), xxx, broad flat white perianth, bolder stem ribbed and suffused more or less with orange-red, very distinct, ht. 12 in. First-Class Certificate R.H.S. per 100, 50/- 7 0 0 8

§†Magpie. See New Seedling Daffodils, page 12 .......... — 4 0

§†Major (4), xx, perianth snowy white, with bright yellow crown, generally suffused with bright orange on first opening, ht. 16 in. ........................................ per 1000, 50/-; per 100, 5/- 0 10 —

§†Minor (4), xx, perianth snowy white, crown bright yellow, the pistil projecting beyond the brim, very distinct and pretty, ht. 12 in. ........................................ per 100, 10/6 1 6 0 2

§†Mrs. Backhouse (4), xx, large broad pure white perianth, clear yellow expanded crown, a very handsome chaste flower, ht. 12 in. ........................................ per 100, 7/6 1 3 —

§†Pulchellus (4), xxx, perianth white, crown yellow, with campanulate and closely imbricated perianth, ht. 15 in. ........................................ 3 6 0 4

§†Resolute (4), xxx, a fine bold flower of Nelsoni form, flower pendulous, perianth broad and of a creamy yellow, crown long and straight, clear yellow, strong grower and free bloomer, ht. 13 in. ........................................ 10 6 1 0

§†Strongbow (4), xxx, broad snowy white perianth and large expanded rich yellow crown of great substance; a sturdy plant with broad thick foliage, ht. 11 in. Award of Merit Birmingham, April 16th, 1903; Award of Merit R.H.S., April 21st, 1903; Award of Merit Royal Botanic Society, April 19th, 1904 ........................................ 48 0 4 6

NARCISSUS TRIANDRUS (syn. Ganymedes).

The White Cyclamen-flowered Daffodil, with reflexing perianth.

The Dainty Little "Angel's Tears" Daffodil (Triandrus albus) was found by our Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot plants, and grown thus should be given cold frame culture. Established on rockwork they form a picture full of grace and beauty. They prefer shade, a gritty soil, and well-drained position.

†Albus (3), an exquisitely beautiful little flower, appropriately called the "Angel's Tears" Daffodil. The flowers are creamy white and are variable in size, perianth elegantly reflexed, ht. 7 in. As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, a proportion may possibly not bloom the first season. The bulbs should therefore be left undisturbed to establish themselves ................................................ per 1000, 60/-; per 100, 6/6 1 0 —

Larger-size bulbs [specially recommended ] 8/6 1 3 0 2

A few extra strong bulbs [for pot culture. ] 15/- 2 3 0 3

†Calathinus (3). One of the most beautiful little Daffodils in existence. The flowers, which are snowy white, are more than twice the size of the Triandrus albus, with long goblet-shaped crown prettily fluted, and are borne two to three on a stem; the foliage has a curious twisting habit, ht. 7 in. (See Illustration, page 33.) For pot culture and rockwork it is a perfect gem. Mr. Peter Barr collected this rare Daffodil some years ago on one of the Glénan Isles, the collecting being attended with a good deal of risk. The bulbs we offer bloom very freely ........................................ 17 6 1 8

Extra large bulbs [specially recommended ] 25 0 0 2

A few monster bulbs [for pot culture. ] 36 0 3 3

†Concolor (3), uniform soft yellow, rare and beautiful, ht. 7 in ........................................ 9 0 0 10

†Pulchellus (4), perianth primrose, cup white, rare and beautiful, ht. 9 in. very scarce — 5 6
NARCISSUS JUNCIFOLIUS.
The Miniature Rush-leaved Daffodil.
A charming and elegant little species for pots (see page 4) or for select spots on rockwork. per doz., ea.

**Juncifolius** (4), a slender-growing dwarf species, with small graceful rich yellow flowers, about the size of a buttercup, with a perfectly flat little crown, ht. 3 to 4 in., flowers delicately fragrant, a native of the Pyrenees .........................per 100, 6/6  1 0...

NARCISSUS ODORUS (syn. Philogyne).
Fragrant Giant Jonquil-Daffodils.
Very graceful, grown 6 in a pot, for indoor decoration, and charming in beds, borders, and naturalised on grassy slopes, etc., valuable flowers for cutting. Grown by the waterside, the *Narcissus odoratus* varieties look charming with their rush-like foliage and profusion of deliciously scented brilliant golden flowers.

§†**Odoratus Campernelle** (Campernelle Jonquil) (2), native of France, perianth and cup full yellow, several flowers on a stem, ht. 18 in. An Extra Selected Early-flowering Strain, and certainly the best for growing in pots................per 100, 42/-; per 100, 4/6

§†**Rugulosus**, true (2), rich yellow, broad imbricated and straight wrinkled cup, a most charming showy variety, valuable for bedding, ht. 18 in.

§†**Rugulosus maximus**, xxx, new 1905, a remarkably handsome flower of model form, resembling *Odoratus rugulosus*, but twice the size, colour rich dark golden, broad imbricated perianth, and bold straight channelled cup, fragrant. First-Class Certificate Birmingham, April 18th, 1906; R.H.S., April 17th, 1906; and R.B.S., April 18th, 1906. Illustrated in "Gardener's Chronicle," April, 1906 ......each £2 5/-

§**Heminalis**, true (3), native of England, rich yellow, with long handsome cup, delightfully fragrant, very distinct, ht. 15 in.; it is best grown in shade or in grass with a north aspect. The variety generally sent out under this name is simply *N. odoratus* or *N. odoratus rugulosus* .........................per 100, 21/-.

NARCISSUS ODORUS PLENUM.
Queen Anne's Double Jonquils.

**Plenus**, Queen Anne's Sweet-Scented Double Jonquil (2), native of England and Ireland; this beautiful sweet-scented yellow rose-like Double Daffodil makes a delightful pot plant (5 or 6 bulbs in a pot), and is charming in shady beds and borders, or naturalised in grass, etc., ht. 12 in. ..................per 100, 42/-

**Campernelle plenus** (3), a very interesting and rare variety, bearing several characteristic double yellow flowers of elegant form, on tall graceful stems, sweetly scented, ht. 20 in. ..................per 100, 60/-

GROUP III.—PARVI-CORONATI.
Dolly-Cup or Poet's Narcissi.

DISTINGUISHING CHARACTER.—Depth of Cup Less than One-Quarter the Length of the Perianth Segments (Petals).

In this section, *Poeticus* (the true Poet's Daffodil) is the flower popularly called the *Narcissus*; *Burbidgei* is a hybrid between *Incomparabilis* and *Poeticus*, and is the connecting link between Groups II. and III., *Biflorus* is Parkinson’s Primrose-Peersless; a hybrid of *Tazetta and Poeticus*; *Gracilis* and *Tenuior* are the Helena of Haworth; *Jonquilla* the Jonquil of Linnaeus; *Polyanthus Narcissus* the Hermione of Haworth and Tazetta of Sibthorp.

NARCISSUS BURBIDGEI.

Hybrid Poet's Narcissi, or Dolly-Cup Daffodils.

These with their light and graceful habit and beautiful blossoms are much valued as pot plants (3 to 6 in a pot), and for vases, bouquets, and buttonholes; in beds and borders they are specially attractive, while naturalised in grass few plants are so beautiful.

The Burbidgei Narcissi differ from *N. Poeticus* in the cup of the flower being generally a trifle longer and not so flat; the early forms commence flowering before *Poeticus ornatus*, and continue flowering in succession, one variety after another, from March to the middle of May.
Narcissus Burbidgei—continued.

NARCISSUS POÉTIQUES.

The true Narcissus or "Poet's Daffodil." These all have snowy white perianth segments (or petals), with a flattened cup, cinnabar-red or edged with cinnabar-red.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced, while as border plants and for naturalising in grass they are all of the greatest value.

Referring to the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: "Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley."

Early planting and liberal culture is specially recommended for these Poet's Daffodils.

To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry.

†Almira (5), xx, a beautiful large-flowered variety with broad round white perianth of fine substance, cup margined deep red, ht. 15 in. .......................... per 100, 15/- 2 3...0 3

†Cassandra (4), xxx, one of the finest of the Poétiques Narcissi; a noble and perfectly shaped flower of fine substance, with broad wide-spreading clear white perianth, cup deeply rimmed dark red; habit tall and vigorous, ht. 17 in. AWARD OF MERIT R.H.S. 25 0...2 3

†Chaucer (3), xx, the earliest of the new Poétique varieties, pure white perianth of fine round form, cup large and flat, of a vivid scarlet 21 0...2 0

NARCISSUS POÉTICUS, DOUBLE.

The Gardenia-flowered Sweet-scented Narcissus.

Double White Poeticus (6), xxx, large double snowy white sweet-scented Gardenia-like blossoms, much prized for cutting, ht. 15 in. To obtain fine handsome flowers this Narcissus should be planted early in a good deep cool soil not too dry.

**Extra fine selected stock, per 1000, 35/-; per 100, 4/-**

NARCISSUS POETAZ.

New Hybrids of Narcissus Poeticus × Polyanthus Narcissi.

A fine new race of Daffodils, resulting from a cross between Poeticus ornatus and the finest varieties of Polyanthus or Bunch-flowered Narcissi, the Poeticus being the seed-bearing parent. The plants are tall, vigorous growers, and bear a head of 3 to 4 large well-formed flowers, deliciously fragrant. In pots or in the flower border they are very decorative, while the flowers are highly prized for cutting.

NARCISSUS BIFLORUS.—Primrose Peerless Daffodil.

§Biflorus (5), xx, pure white perianth, yellow crown, a useful late-flowering Daffodil per doz. each to naturalise, ht. 15 in. Found wild in various parts of Europe

per 1000, 30/-; per 100, 3/6 0 6... —

§Biflorus var. hybridus (5), xx, a very interesting form collected by Mr. Peter Barr a few years ago at Montpellier; it is many-flowered, with blooms larger than, and distinct from, the ordinary type, ht. 18 in. 2 3...0 3

VARIous RUSH-LEAVED NARCISSI.

These graceful Narcissi bloom in May, and are very elegant in pots as well as the flower-border.

§Gracilis (5), xx, an elegant rush-leaved Daffodil, 3- to 5-flowered, pure yellow, sweet-scented, the last to bloom, opening about end of May, ht. 14 in. per 100, 6/6

†Intermedius “Sunset” (5), xxx, canary yellow perianth and large glowing orange-red cup, 4 to 5 flowers on a stem, remarkably showy and beautiful, ht. 16 in.

Award of Merit R.H.S. per 100, 17/6

†Seroninus (5), a rare little Narcissus, producing in October, on slender stems, dainty little star-shaped flowers with silvery white perianth and a minute golden-yellow cup, sometimes two to three flowers on a stem, fragrant, ht. 10 in. It requires a warm spot on rockwork and to be lightly covered during winter; it may also be grown in pots in a cold frame per 100, 6/6

†Tenuior (the Slender Straw-coloured Daffodil), (4), xx, perianth sulphury white, cup yellow, several flowers on a stem, ht. 9 in. per 100, 7/6

†Virdiflorus. See New and Rare Daffodils, page 13

NARCISSUS JONQUILLA.—Sweet-Scented Jonquil.

These are the true sweet-scented Jonquils; both the single and the double make capital pot plants; if grown outdoors plant in a warm fairly sunny situation, and slightly raised beds, and protect during very severe weather.

†Jonquilla (The Single Sweet Jonquil) (5), graceful heads of rich yellow flowers, prized for their delicious scent, ht. 14 in.; valuable as a cut flower per 1000, 25/-; per 100, 2/9

Extra large bulbs 35/-; 4/-

† Flore-pleno (The Double Sweet Jonquil), heads of double rich yellow flowers, very fragrant; prized for cutting per 100, 8/6

NARCISSUS TAZETTA (Nosegay Daffodils).

§ For the Large-flowered Dutch Varieties of Narcissus Tazetta (Bunch-flowered Narcissi or Nosegay Daffodils), and the Sacred or Good-Luck Lily of China, see General Bulb Catalogue.

DAFFODIL NOTICES.

Naming Daffodils.—Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 3s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Surret, Surrey.

Daffodil Prizes.—Particulars of Competitions, Spring 1909, for Barr’s Silver Daffodil Vases, will be sent on application.

MANURES, SOILS, FIBRE, VASES & BOWLS FOR DAFFODILS.

Basic Slag, best quality, per cwt. 10/6; per 7 lbs. 1/- (bags free).

Bone Meal (Genuine Crushed Bones), best quality, per cwt. 14/-; per 7 lbs. 1/3 (bags free).

Sulphate of Potash, finest quality, per cwt. 21/-; per 7 lbs. 1/6 (bags free).

Barr’s Phytobroma, for Daffodils, Hyacinths, Tulips, etc. We can confidently recommend this as a safe general manure; it should be mixed with the soil below the bulbs at planting time at the rate of 2 to 3 oz. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given—using the same quantities.

For Pots, mix Phytobroma with the soil, to be used at the rate of 1 lb. to the bushel, and in spring, when growth is showing, top dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-1b. tin, 1/1; 7 lbs. 2/6; 14 lbs. 4/6; 28 lbs. 7/6; 56 lbs. 12/6; 1 cwt. 70/- (bags free).

Barr’s Special Mixed Potting Soil, containing a suitable quantity of Phytobroma, 2/6 per bushel (bags free).

Barr’s Specially Prepared Fertilised Fibre, Shell, and Charcoal Mixture, for growing bulbs in vases, bowls, jardinets, etc. (see page 4). 3/6 per bushel; 1/- per peck (bags free).

Small Pebbles and Charcoal, 6d. per quart; 3/6 per peck.

Barr’s Special Douton Ware Bulb Vases (without drainage hole), suitable for growing Daffodils, etc., in:—2½ in. diameter, 7/9; 4 in. dia. 1/3; 5 in. dia. 2/9; 7 in. dia. 3/6 each. Fancy Decorated Japanese Bowls (without drainage hole):—5 in. diameter, 7/10; 6 in. dia. 1/3; 7 in. dia. 1/9; 8½ in. dia. 3/-; 9½ in. dia. 4/-. 10½ in. dia. 6/-; 12 in. dia. 8/6 each.
USEFUL TOOLS FOR BULB PLANTING, Etc.

**Barr's Special Bulb Planter** (Regd. 368338), specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early autumn rains and not when in a hard and baked condition, as it is then impossible to use this or indeed any other tool with success. By the use of Barr's Special Bulb Planter a large quantity of bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 36 inches over all, weight about 3 1/2 lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2 inches diameter.

We shall send the medium size (2 1/4 in.) if no instructions to the contrary are given.

**Barr's Special Bulb Dibber** (Regd. 468678), specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron treadle and cross wooden handle; a good strong heavy tool, weight about 6 1/2 lbs., length 36 inches over all. 9/6 each.

**Barr's Special Bulb Trowel,** made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

New Pattern Daffodil Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring, when Daffodils are just showing; also a useful weeding tool. With 3 ft. handle (41 inches over all, and weight under 1 lb.). 1 9/ each, with short handle (12 1/2 inches), 1 3/ each.

For Wooden Labels and other Garden Requisites, see BARR'S SEED GUIDE. Free on application.

### Daffodil Coloured AND Uncoloured Plates.

These Daffodil Plates can be had, post free, at the following charges:—

1. Two large Uncoloured Illustrations, one representing a group of Yellow Trumpet Daffodils, and the other a group of White Trumpet Daffodils, drawn and arranged for the "Gardener's Chronicle" by Agnes Barr. The two Plates for 1s.

8. Coloured Plate of Daffodii *Barrii conspicuus, Glory of Leiden, Queen of Spain, Victoria*. 3d.

A COMPLETE SET OF THE ABOVE PLATES SENTS POST PAID, FOR 31. 6d.

Good Water-colour Paintings of any Daffodils can be supplied (to order) during the Daffodil flowering season at the rate of 10s. 6d. per Bloom; Wash Drawings in black and white, 7s. 6d. per bloom. Orders should be given early.

### THREE INTERESTING BOOKS ON THE DAFFODIL.

**John Parkinson's** "Paradisi in Sole Paradisus Terrestris," or A Garden of all sorts of pleasant flowers which our English ayre will permit to be nourish'd up; with A Kitchen garden of all manner of herbs, roots, & fruiites, for taste or sauce used with us, and An Orchard of all sorte of fruitbearing Trees and Shrubbes fit for our Land together. With the right orderinge, planting & preserving of them and their uses & vertues, Collected by John Parkinson, Apothecary of London, 1629." Faithfully reprinted from the Edition of 1629; a delightfully written, interesting old book. £2 2s.

The **Book of the Daffodil** (by Rev. S. E. Bourne), containing valuable information on the cultivation of the Daffodil gained by the results of the author's own personal experience, 2/6; post free, 2/9.

**Narcissus, Its History and Culture** (by F. W. Burbridge), with coloured figures of species and principal varieties, and a review of the classification by J. G. Baker, F.L.S., with 48 coloured plates, £1 10s.
Special Notices and Terms of Business.

FREE CARRIAGE OF BULBS.

All Orders for Bulbs to value £1 and upwards sent Carriage Paid to any Railway Station in the United Kingdom.

Prepaid Orders for Bulbs to value 10s. and upwards sent Carriage Paid to any Railway Station in the United Kingdom.

5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (with the exception of the special Collections offered on pages 6 and 7, which are strictly nett), and this may be deducted by the Customer when remitting or if this is not done, a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb Accounts of 20s. and upwards when paid within 14 days from date of invoice (excepting Collections offered on pages 6 and 7, which are strictly nett).

Terms of Credit.—Our books are made up at Christmas and Midsummer, when all accounts are due nett.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London and County Bank." Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. Returned envelopes should have the sender's name on the address-label for identification, and an advice sent by post, stating date of dispatch and name of Railway Co.

Catalogues.—Our Seed Guide is published in January, Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting in January, Hardy Plant Catalogue 1st of March, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Our Surbiton Nurseries.—Visitors are invited during Spring to see our magnificent Collections of Daffodils and Tulips in bloom. The Nurseries are situated less than a mile from Surbiton Station on the London and South-Western Railway. Cabs are always to be had at Surbiton Station.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

Registered Telegraphic Address—BARR, LONDON. Telephone—2991 CENTRAL.

Notices to our Foreign and Colonial Correspondents.

Prepayment necessary.—Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders a remittance, a draft, or an "order to pay" on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Cash Discount 5%.—In the case of Prepaid Orders to value 20s. and upwards we allow a discount of 1s. in the £ from the amount of Bulbs or Seeds ordered, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage.—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Packing.—A moderate charge will be made where special materials have to be used, such as Sphagnum Moss, Oil-silk, or hermetically sealed tin cases, and where any special packing necessitates a great deal of labour (as in the case of some Plant Orders), when out-of-pocket expenses only will be charged.

Parcel Post Rates.—AUSTRALIAN COMMONWEALTH (P. & O. and Orient Lines direct): 6d. per lb. (1s. for the first lb.). Via Italy (journey 6 days shorter): not exceeding 1 lb., 2s.; every additional lb. 6d.

NEW ZEALAND: under 3 lb. 1s.; 7 lb. 2s.; 11 lb. 3s.
TASMANIA: 6d. per lb. (minimum charge 1s).
CAPE COLONY and NATAL: 9d. per lb. TRANSVAAL: 1s. per lb.
INDIA (P. & O. Line direct): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s. Via Italy (journey a week shorter): Under 3 lb., 2s.; under 7 lb., 3s.; under 11 lb., 4s.
CANADA: 6d. per lb. (5d. for the first lb.)
JAPAN (via Canada, journey 24 days to Yokohama): Under 3 lb., 2s.; under 7 lb., 3s.

UNITED STATES of America. By Official Service to all places in U.S.A. Under 3 lb., 1s. 6d.; under 7 lb., 2s. 6d.; under 9 lb., 3s. 6d.; under 11 lb., 4s. 6d.

Shipping, etc.—In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Bulbs reach their destination. Our Customers will confer a favour if they report, on arrival, the condition of the goods. Our experience in successfully preparing and shipping Seeds, Bulbs, and Plants to India and the Colonies extends over a long period.
